

Government of India
Ministry of Agriculture & Farmers Welfare
Department of Agriculture & Farmers Welfare

**Weekly report/ Minutes of the Crop Weather Watch Group
(CWWG) meeting as on 25.05.2026**

Key Insights

1. Rabi Season harvest and Summer Season Sowing Status:

- As on May 22, 2026, the area sown under summer crops is 86.02 lakh ha as compared to 83.50 lakh ha during the corresponding period of last year. Of this, area of 31.05 lakh ha has been sown under Rice this year. There is also an increase in the area sown under Maize by about 1.50 lakh ha so far from the last 5-years average.
- As on 22.05.2026, 97.92% of area has been harvested for Rabi crops all over India. The harvest of pulses, oilseeds, and Shri Anna-cum-coarse cereals has been completed; 79.71% area of Rice and 99.50% area of Wheat has been harvested for Rabi crops 2025-26.

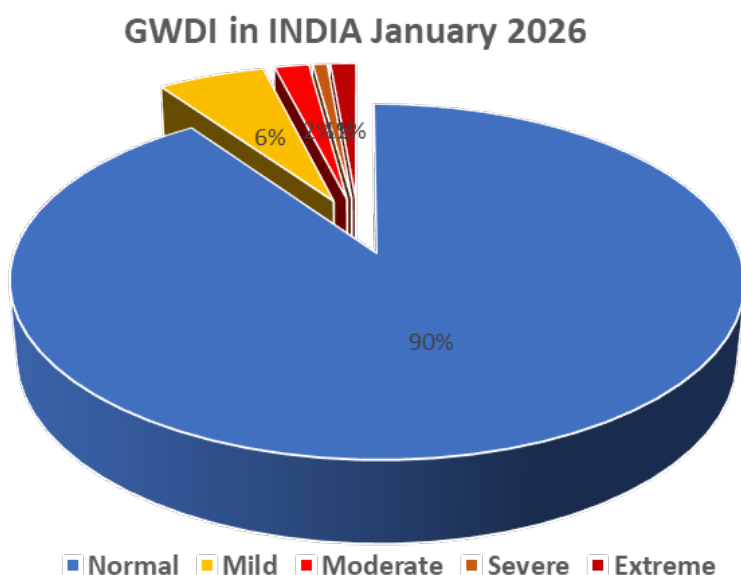

2. Weather Update:

- a) Temperature: Maximum temperature is likely to be above normal in many parts of Northwest India, Chhattisgarh, East India, Northeast India and northern part of Coastal Andhra Pradesh. Heat wave to severe heat wave conditions likely to prevail over northwest and central India during many days of the week.
- b) Rainfall Distribution: From March 01– May 24 2026, the All-India cumulative rainfall is 1% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: 5%; (ii) Northwest India: (-) 8%; (iii) Central India: 19%; and South Peninsula: (-) 3%.
- c) A fresh Western Disturbance likely to affect Northwest India from 28th May, 2026.
- d) Isolated heavy to very rainfall likely over Kerala & Lakshadweep, Tamil Nadu, Northeast & adjoining east India during next 4-5 days.
- e) Isolated light to moderate rainfall with thunderstorm, lightning & gusty winds likely over Vidarbha during 26th-28th; Konkan & Goa on 27th & 28th; Madhya Maharashtra during 25th-28th, Marathawada during 25th-27th May; Punjab, Haryana & Chandigarh, West Uttar Pradesh during 28th-30th; East Uttar Pradesh during 25th-29th and Rajasthan on 30th May.
- f) Heat wave to severe heat wave conditions likely to continue to prevail over Central & Northwest India during next 7 days; East & adjoining Peninsular India during next 3-5 days. Reduction in maximum temperatures likely from 29th May onwards.

3. Inputs Situation

- a) **Water Reservoir Status:** As on 21 May 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 60.830 billion cubic meter, which is 33.14% of total live storage capacity (183.565 BCM). The current year's storage is nearly 111.95 percent of last year's storage and 124.39 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.

- **Groundwater Levels:** In Post-monsoon 2025, In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.
- The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.
- About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.
- The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, Nagaland.

b) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases:** Intensity of pests and diseases at some fields has been reported to be above Economic Threshold Level for Litchi (Stinkbug and Mealy bug) in Bihar and for Rice (Neck Blast) in Assam. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out. The overall intensity of pests and diseases remained below the Economic Threshold Level

5. **Crops whose Mandi Wholesale prices are below MSP:**

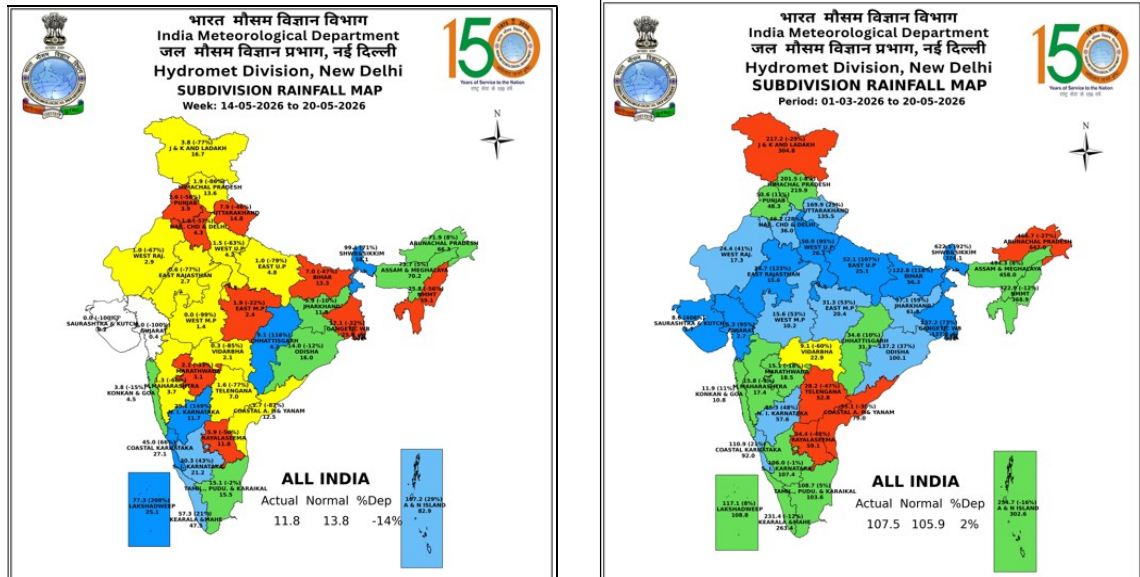

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 22-05-2026	% Variation over MSP
Paddy (Rice unmilled)	2369	2178	-8.06
Wheat	2585	2456	-4.99
Maize	2400	1896	-21.00
Arhar	8000	7681	-3.99
Gram whole	5875	5656	-3.73
Moong	8768	7503	-14.43
Urad	7800	7694	-1.36
Bajra	2775	2308	-16.83
Ragi	4886	3688	-24.52
Groundnut	7263	7261	-0.03
Sunflower	7721	7385	-4.35

All the commodities are currently going below MSP during this week.

Details of each Segment

1. RAINFALL

- During the week (14 May – 20 May 2026), lower rainfall was observed, as compared to Long Period Average (LPA) by 14%. Cumulative seasonal rainfall (01st March to 20 May 2026) is higher than LPA by 2%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- a) RainFall figures are based on operation data.
- b) Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- c) Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Overall, thunderstorm activity is likely to continue over the east & northeast, and the southern peninsular India during some/many days of the week.
- Overall, rainfall is likely to be normal to above normal over most parts of the country except over some parts of the Western Himalayan region during the week.

TEMPERATURE: MIN & MAX

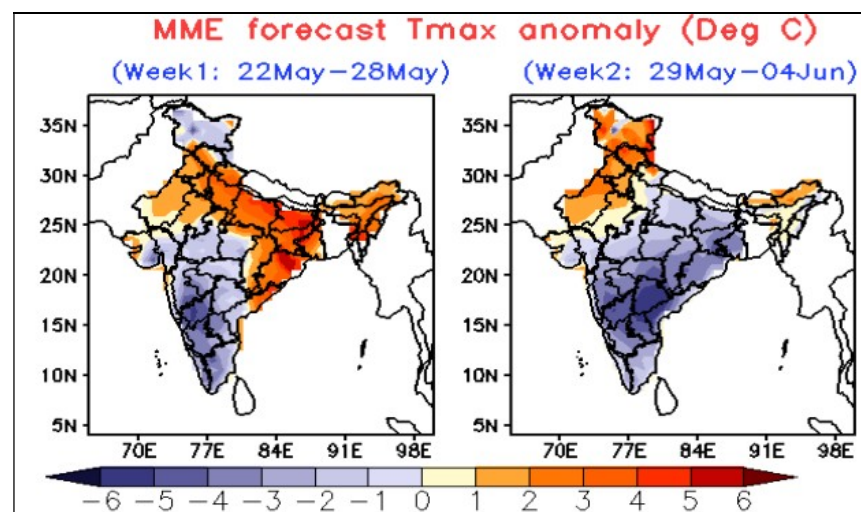

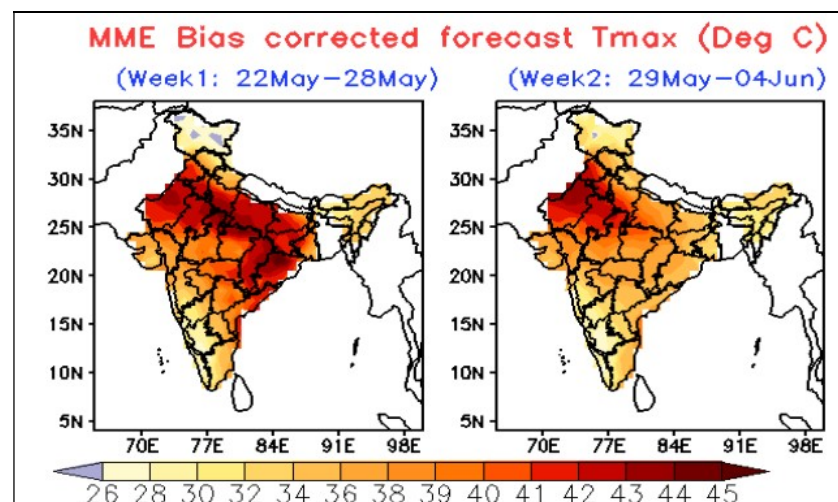

Week 1 (22 May – 28 May 2026):

- No significant change in maximum temperatures likely over many parts of Northwest India till 28th May and gradual fall by 3-5°C on 29th & 30th May.
- Gradual rise in maximum temperatures by 2-3°C likely over Punjab till 26th May; no significant change on 27th & 28th May and gradual fall by 3-5°C on 29th & 30th May.
- No significant change in maximum temperatures likely over Central India till 28th May and gradual fall by 2-4°C on 29th & 30th May.

- No significant change in maximum temperatures likely over East India till 26th May and gradual fall by 2-3°C during 27th - 30th May.
- No significant change in maximum temperatures likely over the rest parts of country till 30th May 2026.

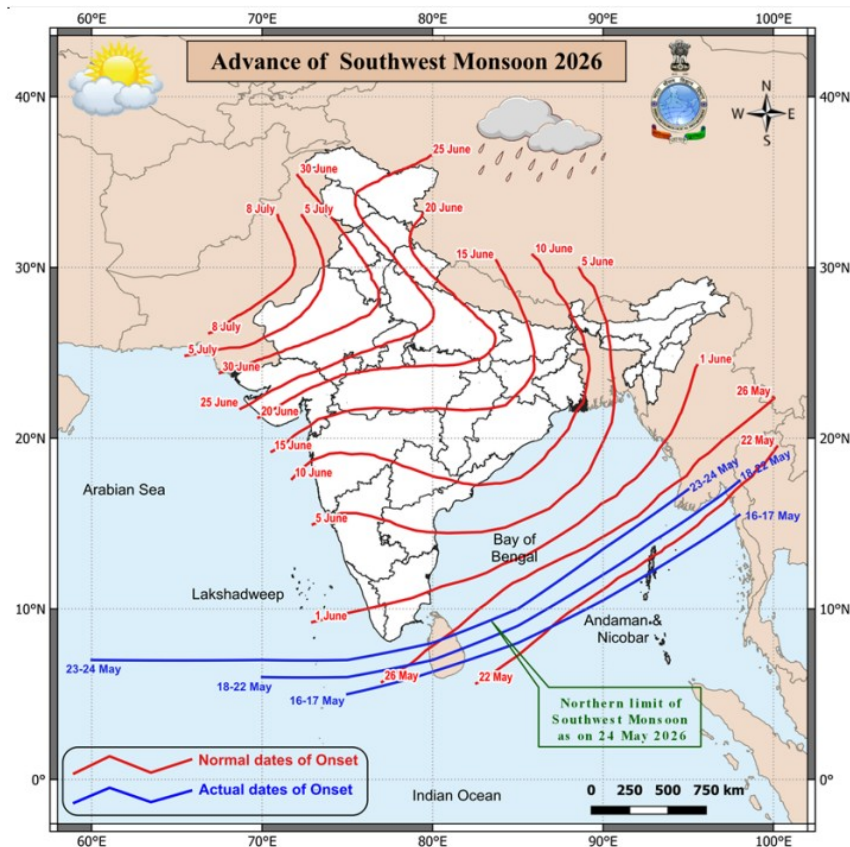

Week 2 (29 May – 04 June 2026):

- Low to moderate probability of Heatwave conditions likely over some parts of northwest India (Punjab, Haryana, Rajasthan, Uttar Pradesh, Jammu & Kashmir, southern parts of Himachal Pradesh & Uttarakhand) during some/many days of the week.
- Above normal (+1.6 to +3.0°C) to appreciably above normal (+3.1 to +5.0°C) maximum temperatures are likely over some parts of northwest India, and over some parts of northeast India. Below-normal maximum temperatures (-1.6 to - 3.0°C) are likely across some parts of South Peninsular India, and near-normal maximum temperatures are likely across the rest of the country during the week.
- Low probability of warm night conditions is likely over Punjab, Haryana, and adjoining West Uttar Pradesh on some days of the week.

Advance of Southwest Monsoon 2026:

- The Northern Limit of Monsoon continues to pass through 7°N/60°E, 7°N/70°E, 7°N/75°E, 8°N/80°E, 10°N/85°E, 13.5°N/90°E, and 17°N/95°E as on 24th May 2026.
- Conditions are favourable for further advance of southwest monsoon into some more parts of southwest & southeast Arabian Sea, Comorin Area, southwest, southeast & eastcentral Bay of Bengal and remaining parts of Andaman Sea during next 2-3 days.

2. CROPS

Rabi Crops - Area coverage

- **Rice:** About 31.05 lakh ha area coverage under Summer Rice has been reported as compared to 32.42 lakh ha during the corresponding period of last year.
- **Pulses:** About 27.91 lakh ha area coverage has been reported compared to 27.26 lakh ha during the corresponding period of last year.
- **Oilseeds:** About 11.04 lakh ha area coverage has been reported compared to 9.58 lakh ha during the corresponding period of last year.

Progress of Area coverage under Summer crops as on 22.05.2026						
(In lakh hectare)						
Sl. No.	Crops	Normal Summer Area (DES)*	Final Summer Area 2025	Area Sown		Increase/ Decrease over corresponding period of Last year

3. RESERVOIR STORAGE

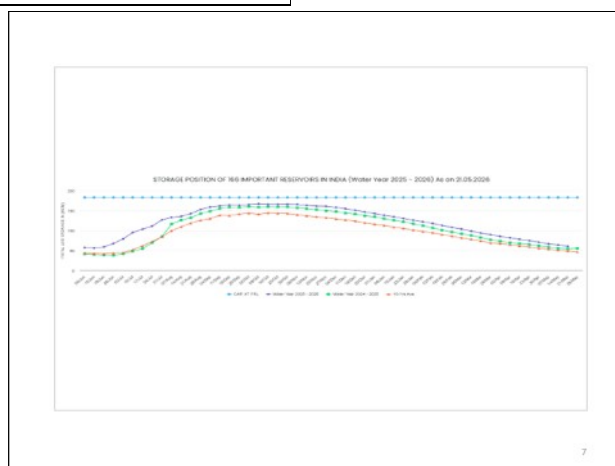

As on 21 May, 2026, the current live storage in 166 reservoirs was 60.830 BCM (33.14%) of total live capacity of 183.565 BCM.

- 129 reservoirs having storage more than 80% of normal storage.
- 26 reservoirs having storage 51% to 80%.
- 11 reservoirs having storage upto 50%.

The status for 166 major reservoirs of the country			
Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	33	113	124
Last Week	34	112	124

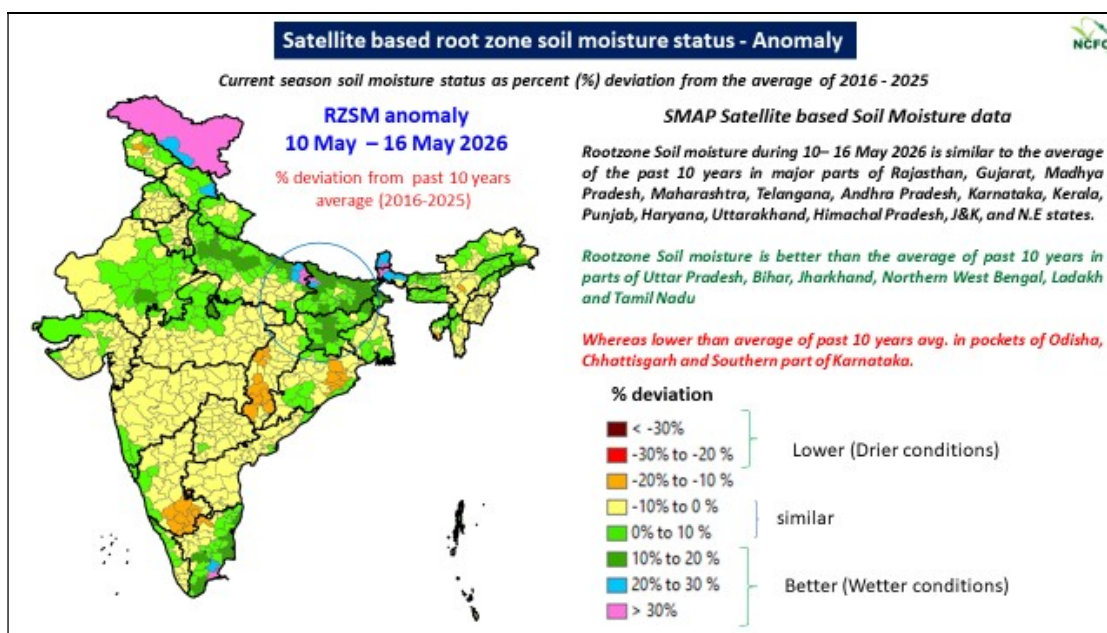

Source: CWC

5. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

Soil Moisture Observation

- Soil moisture during 10 May – 16 May 2026 is similar/ better than the average of the past 10 years in major parts of Rajasthan, Gujarat, Madhya Pradesh, Maharashtra, Telangana, Andhra Pradesh, Karnataka, Kerala, Punjab, Haryana, Uttarakhand, H.P., J & K and N.E. States.
- Soil moisture is better than the average of the past 10 years in parts of Uttar Pradesh, Bihar, Jharkhand, Northern West Bengal, Ladakh and Tamil Nadu.
- It was lower than average of past 10 years in pockets of Odisha, Chhattisgarh and Southern parts of Karnataka.

6. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Kharif 2026 as on 22.05.2026 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2026	Total sale during Kharif 2026	(as on 22/05/26)		
			Availability	Sales	Closing stock
UREA	194.02	27.96	93.85	27.96	65.90
DAP	59.17	6.93	26.03	6.93	19.10
MOP	17.57	2.00	9.64	2.00	7.63
NPK	84.99	11.61	60.91	11.61	49.30
SSP	34.81	4.72	29.09	4.72	24.36
TOTAL	390.56	53.23	219.52	53.23	166.29

- In case of DAP, The opening stock of Kharif 2026 as compared to the opening stock of Kharif 2025 is more by 11.78 LMT
- As on 22th May, 2026 the availability of DAP is 26.03 LMT against the requirement of 8.75 LMT during the ongoing Kharif 2026 season.
- As on 22nd May 2026, adequate stock of Urea (93.85 LMT), DAP (26.03 LMT), MOP (9.64 LMT), NPK (60.91 LMT) and SSP (29.09 LMT) is available.

7. PEST & DISEASE

- The overall intensity of pests and diseases remained below the Economic Threshold Level except:

फसल Crop	राज्य State	जिला/उपजिला/गांव District/ Sub District/ Village	स्रोत/ Source	कीट/रोग Pest Disease	तीव्रता Intensity	की गई कार्रवाई/टिप्पणी Action Taken/ Remark
					संक्रमित/प्रभावितक्षेत्र *ETL (हेक्टेयर) सेऊपर /Area infested/Infected above *ETL (ha)	
Litchi	Bihar	Vaishali Muraul/ Asadpur, Saidpura, Harivanshpur, and Shahdullapur	CIPMC and State Department	Stinkbug	10	- Pest incidence was reported on 23.04.2026 - CIPMC, Patna conducted Joint Survey with State Agriculture Department, Bihar on 23.04.2026 and 07.05.2026. - Survey team issued advisory to farmers including recommended approved control measures where pest population observed near ETL along with IPM practices. - Regular monitoring is being carried out by all field functionaries as follow up action. - Survey reports are attached.
		Muzaffarpur Bishanpur Bakhri, Basantpur, Rohua		Mealy bug	20	
Rice (Bodo Paddy)	Assam	Golaghat Bokakhat	State Department/ NPSS	Neck Blast	280	- Pest incidence was reported on 09.05.2026 - Advisory issued through State WhatsApp group. - Regular monitoring is being carried out by all field functionaries as follow up action. - State Department status report and advisory is attached. - Also RCIPMC, Guwahati issued the advisory and share with State Government for wide publicity. (Copy attached).
