Department of Agriculture & Farmers Welfare

Weekly report/ Minutes of the Crop Weather Watch Group (CWWG) meeting as on 01.06.2026

Key Insights

1. Rabi Season harvest and Summer Season Sowing Status:

- As per 3rd Advance Estimates 2025-26, the area sown under the summer crops is 87.26 lakh ha as compared to 83.91 lakh ha during the corresponding period of last year. As compared to previous year, Rice area declined by 0.65 lakh ha whereas, Maize area increased by 2.08 lakh ha, Groundnut by 1.03 lakh ha, Urad by 0.76 lakh ha and Shree Anna by 0.70 lakh ha.
- As on 01.06.2026, rabi crops harvesting has been completed in all states.

2. Weather Update:

- a) Temperature: Maximum temperature is likely to be below normal in most of country except in Northeast India.
 - b) Rainfall Distribution: From March 01– May 31 2026, the All-India cumulative rainfall is 1% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: 1%; (ii) Northwest India: (-) 6%; (iii) Central India: 17%; and South Peninsula: 0%.
- The Western Disturbance as a cyclonic circulation over northwest Uttar Pradesh & neighbourhood between 3.1 & 7.6 km above mean sea level with a trough aloft in middle & upper tropospheric westerlies with its axis at 5.8 km above mean sea level roughly along Long 78°E to the north of Lat 20°N persists.
 - Isolated heavy rainfall likely over Northeast India and South Peninsular India during the week.
 - Moderate to Severe Thunderstorm activity with squally wind speed upto 90kmph and isolated hailstorm likely over Northwest, Central & adjoining East India on 31st May. Isolated Hailstorm activity likely over Odisha, West Madhya Pradesh and Madhya Maharashtra on 01st June.
 - Normal to above normal rainfall is expected over central and northwest India.
 - Heat wave condition likely to prevail over Bihar during 04th–06th June.

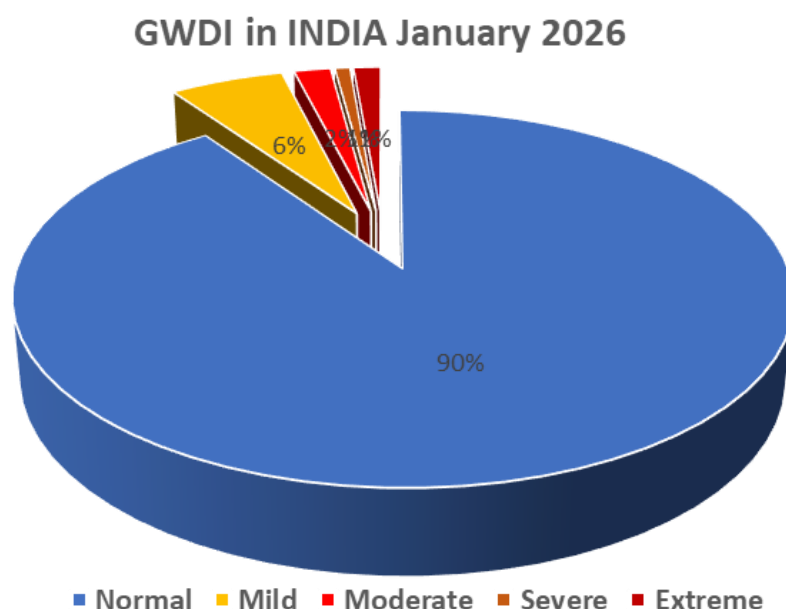

3. Inputs Situation

- a) **Water Reservoir Status:** As on 29 May 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 56.300 billion cubic meter, which is 30.67% of total live storage capacity (183.565 BCM). The current year's storage is nearly 100.73 percent of last year's storage and 119.11 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.

The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.

About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.

The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, and Nagaland.

c) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases**: The overall incidence of pests and diseases remained below the Economic Threshold Level. The monitoring of Cotton crop for Pink Ball Worm is progressing as per the protocol.

5. **Crops whose Mandi Wholesale prices are below MSP:**

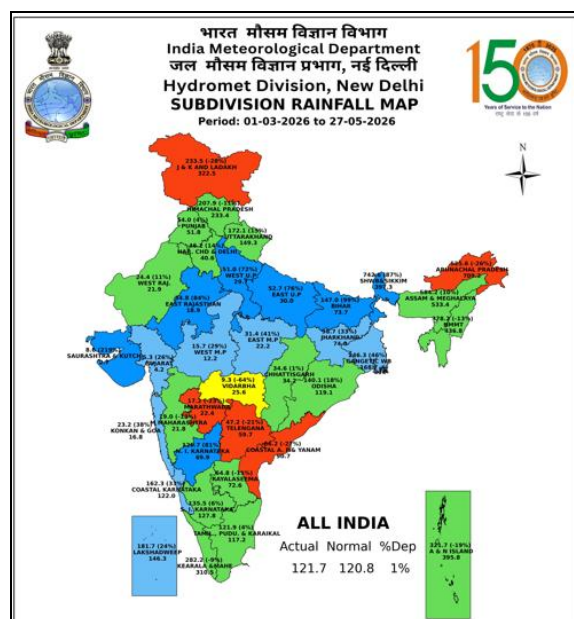

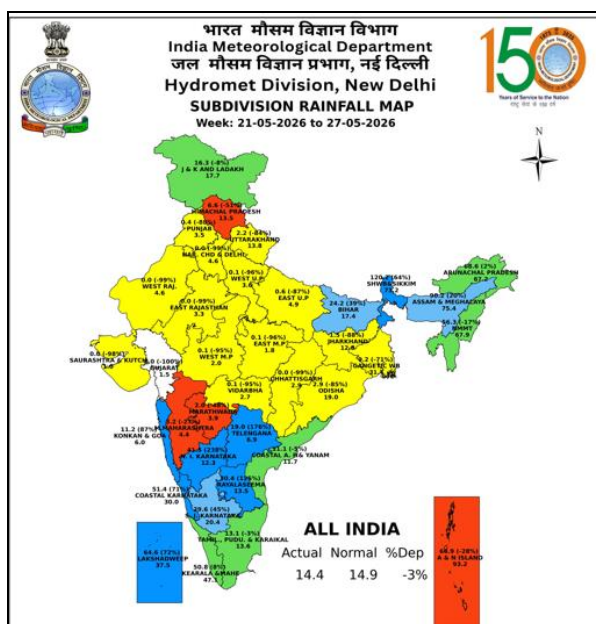

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 29-05-2026	% Variation over MSP
Paddy (Rice unmilled)	2369	2088	-11.86
Wheat	2585	2442	-5.53
Maize	2400	1900	-20.83
Arhar	8000	7491	-6.36
Gram whole	5875	5715	-2.72
Masur	7000	6604	-5.66
Moong	8768	7006	-20.10
Urad	7800	7542	-3.31
Jowar	3699	3603	-2.60
Bajra	2775	2288	-17.55
Ragi	4886	3406	-30.29
Groundnut	7263	6961	-4.16
Sunflower	7721	7678	-0.56

All the commodities are currently going below MSP during this week.

Details of each Segment

1. RAINFALL

- During the week (21 May – 27 May 2026), lower rainfall was observed, as compared to Long Period Average (LPA) by 3%. Cumulative seasonal rainfall (01st March to 27 May 2026) is higher than LPA by 1%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- Rainfall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Normal Rainfall activity likely over central and Northeast India. Below normal rainfall is likely over south peninsular India and western Himalayan region.

TEMPERATURE: MIN & MAX

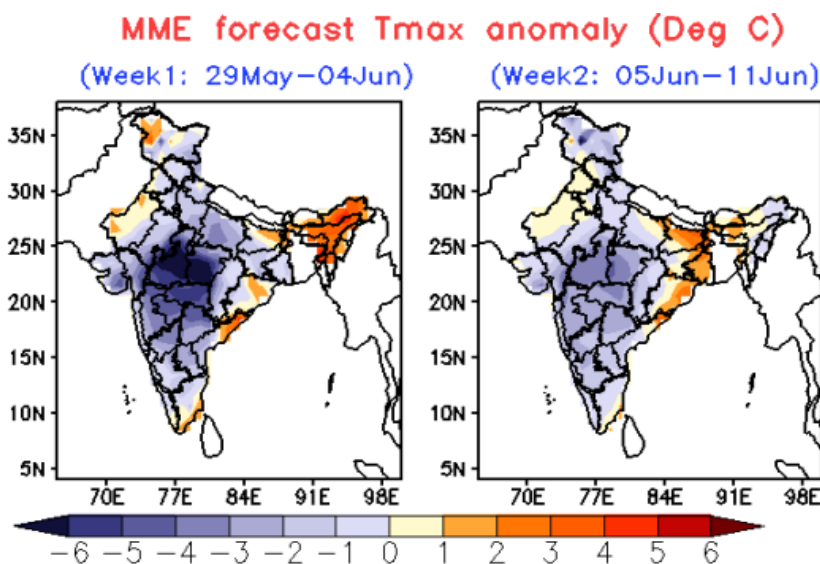

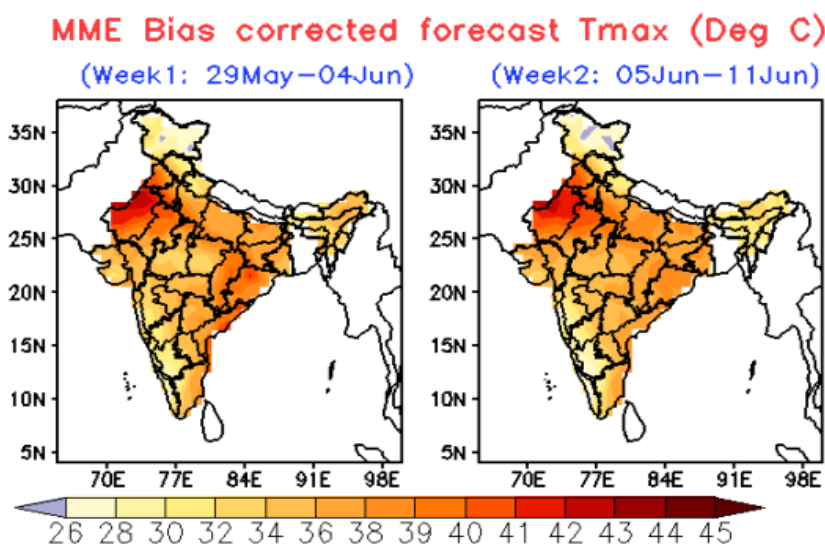

Week 1 (29 May – 04 June):

- Maximum temperatures are very likely to be 5-6 Deg Celsius below normal over most parts of the country during the week except **over North-Eastern States**.

Week 2 (05 June - 11 June 2026):

- Low probability of Heatwave conditions likely over some parts of northwest India (Rajasthan, south Punjab, south Haryana, south Uttar Pradesh) during some days of the week.

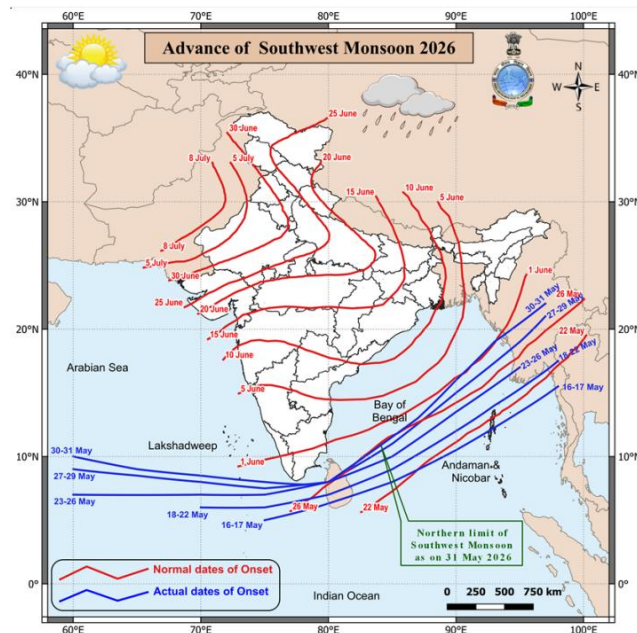

- Above-normal (+1.6 to +3.0°C) to appreciably above-normal (+3.1 to +5.0°C) maximum temperatures are likely over some parts of East India (Bihar, Gangetic West Bengal & Odisha). Near-normal weekly maximum temperatures (-1.5 to +1.5°C) are likely across the rest of the country during the week.
- Maximum temperatures are very likely to be 4-5 Deg Celsius below normal over most parts of the country during week 2 **except many parts of Odisha, West Bengal, Bihar, and Arunachal Pradesh, West Rajasthan, Punjab.**

Advance of Southwest Monsoon 2026:

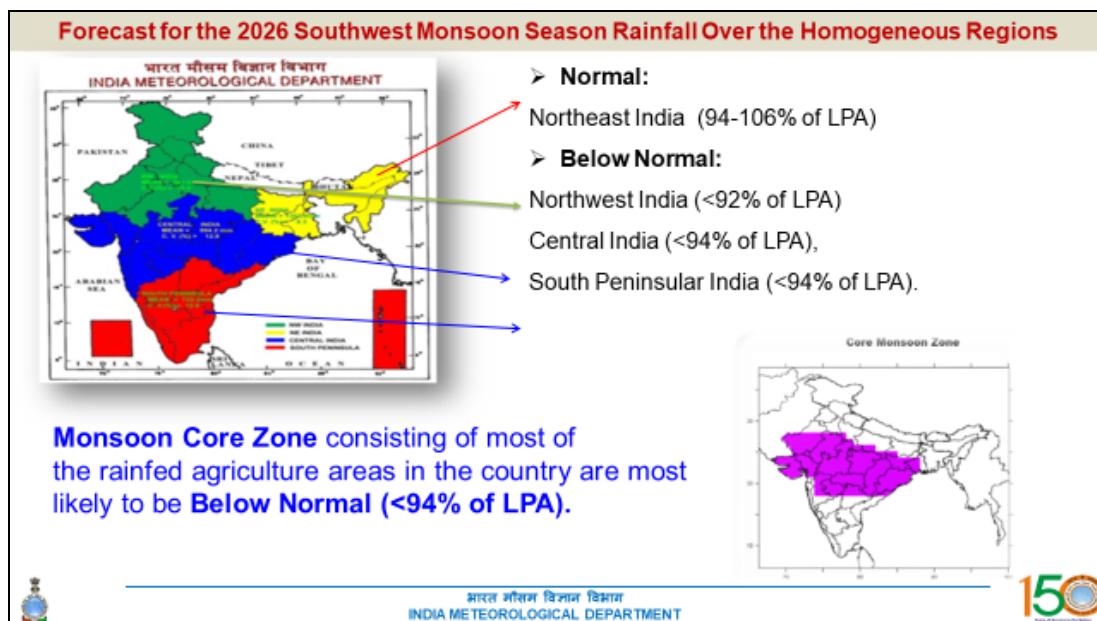

- The Northern Limit of Monsoon continues to pass through 10°N/60°E, 9°/65°E, 8.5°N/70°E, 8°N/75°E, 7.8°N/78°E, 8°N/80°E, 10°N/80°E, 13°N/87°E, 16°N/90°E, 19°N/93°E and 22°N/97°E.
- Conditions are favourable for further advance of southwest monsoon into some more parts of southwest & southeast Arabian Sea, Lakshadweep Islands, some parts of Kerala & Tamil Nadu,

some more parts of southwest, westcentral, eastcentral & northeast Bay of Bengal, and remaining parts of southeast Bay of Bengal during next 3-4 days.

Forecast for the 2026 Southwest Monsoon Rainfall over the Country as a Whole

- Quantitatively, the southwest monsoon seasonal rainfall over the country as a whole is likely to be **90% of the Long Period Average (LPA) with a model error of $\pm 4\%$** , indicating that below normal or less rainfall is most likely.
- The long period average (LPA) of rainfall over the country is about 87 cm based on the data of 1971-2020
- The Probability forecast suggests 84% probability for below normal or less rainfall for the country as a whole against climatological probability of 33%.

2. CROPS

Rabi Crops - Area coverage

- As per 3rd Advance Estimates 2025-26, about 116.3 percent of the normal area has been sown under the summer season crops.
- **Rice:** About 32.63 lakh ha area coverage under Summer Rice has been reported as compared to 33.28 lakh ha during the corresponding period of last year.
- **Pulses:** About 27.16 lakh ha area coverage has been reported compared to 27.07 lakh ha during the corresponding period of last year.
- **Oilseeds:** About 10.62 lakh ha area coverage has been reported compared to 9.51 lakh ha during the corresponding period of last year.

Final Summer Crops Area coverage as per Third Advance Estimates 2025-26				
Crop	Area in Lakh Ha			Increase / Decrease
	Normal	2025-26	2024-25	
Rice	31.49	32.63	33.28	-0.65
Maize	6.98	10.58	8.50	2.08
Jowar	0.34	0.43	0.36	0.07
Bajra	4.43	5.83	5.20	0.63
Shree Anna /Nutri Cereals	4.77	6.26	5.56	0.70
Nutri/Coarse Cereals	11.75	16.84	14.05	2.79
Cereals	43.23	49.48	47.33	2.15
Urad	2.96	4.34	3.58	0.76
Moong	20.44	22.82	23.49	-0.67
Total Pulses	23.40	27.16	27.07	0.09
Total Food Grains	66.64	76.64	74.40	2.24
Groundnut	3.40	5.23	4.20	1.03
Sesamum	4.66	5.04	4.96	0.08
Sunflower	0.34	0.35	0.35	0.00
Total Oil Seeds	8.40	10.62	9.51	1.11
Total	75.04	87.26	83.91	3.35

Disclaimer : For Kharif and Rabi crop-wise estimated area, please see advanced estimates released by Ministry of Agriculture and Farmers' Welfare available on UPaG (upag.gov.in)

3. RESERVOIR STORAGE

As on 29 May, 2026, the current live storage in 166 reservoirs was 56.300 BCM (30.67%) of total live capacity of 183.565 BCM.

- 125 reservoirs having storage more than 80% of normal storage.
- 26 reservoirs having storage 51% to 80%.
- 15 reservoirs having storage upto 50%.

The status for 166 major reservoirs of the country			
Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	31	111	119
Last Week	33	113	124

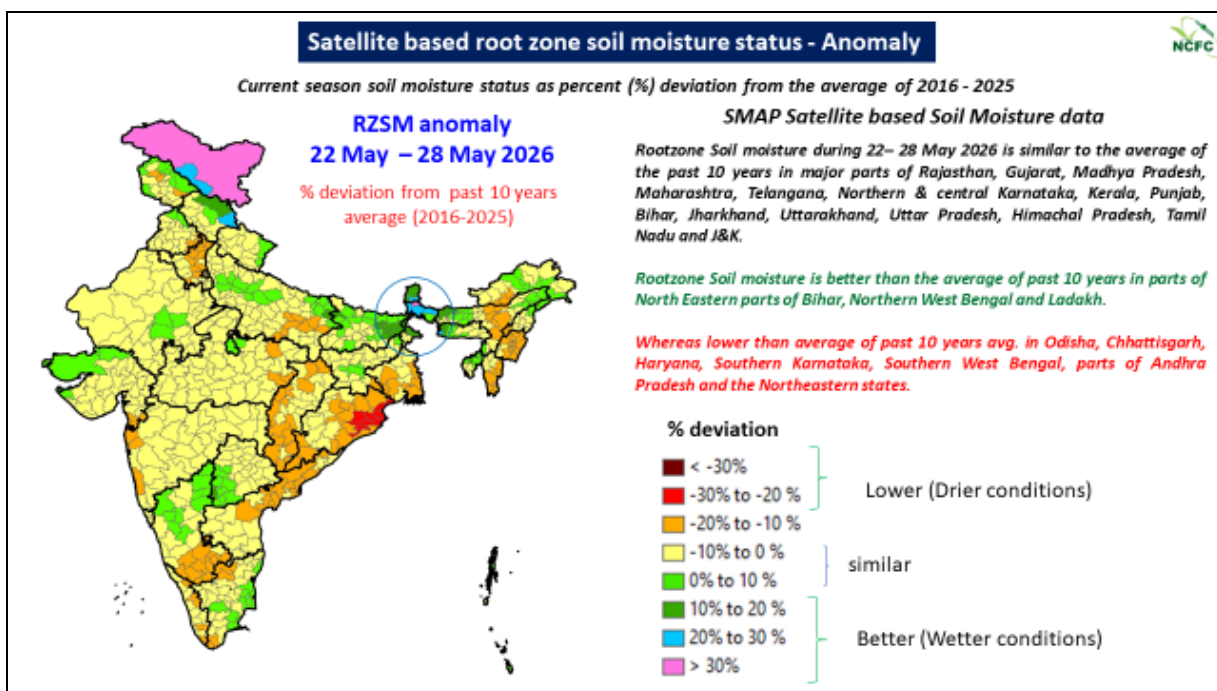

Source: CWC

5. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

Soil Moisture Observation

- Soil moisture during 22 May – 28 May 2026 is similar to the average of the past 10 years in major parts of Rajasthan, Gujarat, Madhya Pradesh, Maharashtra, Telangana, Northern and Central Karnataka, Kerala, Punjab, Bihar, Jharkhand, Uttarakhand, Uttar Pradesh H.P., Tamil Nadu and J & K.
- Soil moisture is better than the average of the past 10 years in parts of Northeastern parts of Bihar, Northern West Bengal and Ladakh.
- It was lower than average of past 10 years in pockets of Odisha, Chhattisgarh, Haryana, Southern Karnataka, Southern West Bengal, parts of Andhra Pradesh and the Northeastern States.

6. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Kharif 2026 as on 29.05.2026 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2026	Total sale during Kharif 2026	(as on 29/05/26)		
			Availability	Sales	Closing stock
UREA	194.02	27.96	101.49	33.53	67.96
DAP	59.17	6.93	27.00	8.45	18.55
MOP	17.57	2.00	10.48	2.37	8.11
NPK	84.99	11.61	63.07	15.01	48.06
SSP	34.81	4.72	30.32	6.02	24.30
TOTAL	390.56	53.23	232.36	65.37	166.99

- In case of DAP, The opening stock of Kharif 2026 as compared to the opening stock of Kharif 2025 is more by 11.78 LMT
- As on 29th May, 2026 the availability of DAP is 27.00 LMT against the requirement of 8.75 LMT during the ongoing Kharif 2026 season.
- As on 29th May 2026, adequate stock of Urea (101.49 LMT), DAP (27.00 LMT), MOP (10.48 LMT), NPK (63.07 LMT) and SSP (30.32 LMT) is available.

7. PEST & DISEASE

- The overall intensity of pests and diseases remained below the Economic Threshold Level.

8. PRICES:
