Department of Agriculture & Farmers Welfare

Weekly report/ Minutes of the Crop Weather Watch Group (CWWG) meeting as on 08.06.2026

Key Insights

1. Kharif Season Sowing Status:

- Kharif sowing data collection has started from 05th June, 2026 and the sowing is in preliminary stage. As on June 05 2026, the area sown under Kharif crops is 72.57 lakh ha (including 54.08 lakh ha in Sugarcane) as compared to 74.61 lakh ha during the corresponding period of last year.

2. Weather Update:

- a) Temperature: Maximum temperature is likely to be above normal in East India and many parts of Northeast India.
- b) Rainfall Distribution: From June 01– 08 June 2026, the All-India cumulative rainfall is 1% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: 1%; (ii) Northwest India: (-) 6%; (iii) Central India: 17%; and South Peninsula: 0%.
 - A fresh western Disturbance is likely to affect Western Himalayan Region from 11th June.
 - Rainfall activity is likely in South India, many parts of Maharashtra, NE India, some parts of Central India, J&K, some parts of Punjab, some parts of Himachal Pradesh, and isolated places in Uttarakhand.
 - Rainfall is likely to be above normal in Kerala, some parts of South Interior Karnataka, Arunachal Pradesh, while it is below normal in coastal Karnataka, Konkan-Goa, Gujarat, Odisha, East India and the NMMT region.
 - Isolated heavy to very heavy rainfall (7-20cm) very likely over Kerala, Karnataka, Tamil Nadu and northeast India during next 7 days with isolated extremely heavy rainfall also likely over Karnataka during 8th – 10th June.
 - Gradual rise in maximum temperatures likely over Northwest India by 2-3°C till 10th June and Gradual fall by 2-4°C thereafter. No significant change in maximum temperatures likely over the rest parts of country till 13th June 2026.

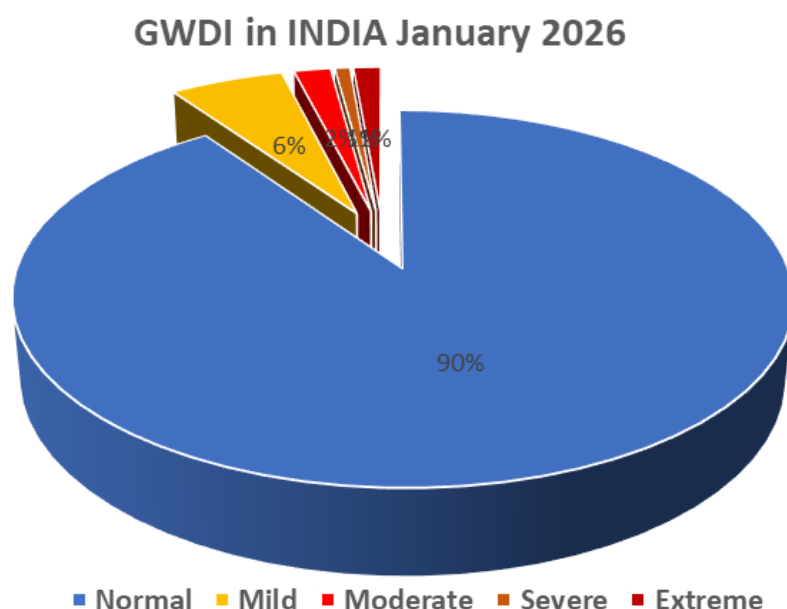

3. Inputs Situation

- a) **Water Reservoir Status:** As on 04 June 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 54.726 billion cubic meter, which is 29.81% of total live storage capacity (183.565 BCM). The current year's storage is nearly 93.86 percent of last year's storage and 118.58 percent of the average storage of the last ten years during the corresponding period. The overall storage position is less than the corresponding period of last year in the country as a whole but is better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.

The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.

About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.

The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, and Nagaland.

c) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases**: The overall incidence of pests and diseases remained below the Economic Threshold Level.

5. Crops whose Mandi Wholesale prices are below MSP:

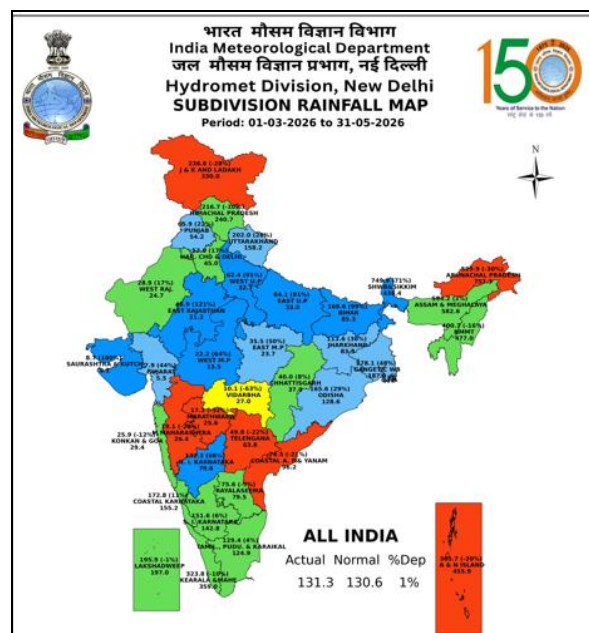

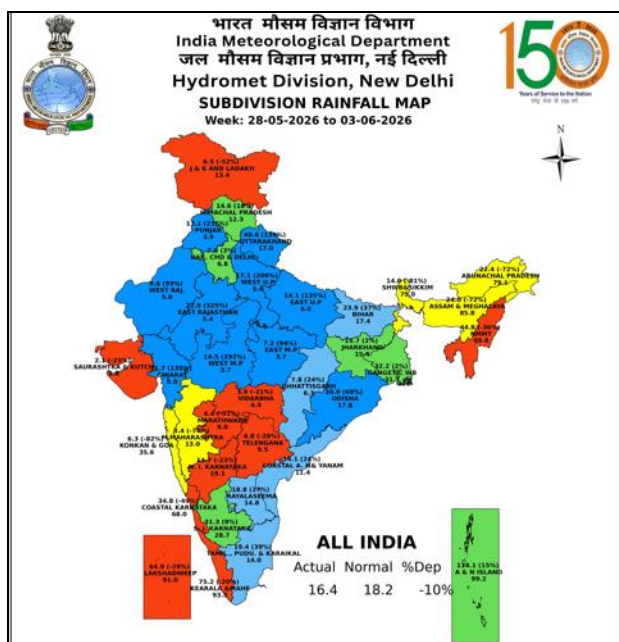

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 05-06-2026	% Variation over MSP
Paddy (Rice unmilled)	2369	2266	-4.35
Wheat	2585	2424	-6.23
Maize	2400	1834	-23.58
Arhar	8000	7422	-7.23
Gram whole	5875	5591	-4.83
Masur	7000	6739	-3.73
Moong	8768	6868	-21.67
Urad	7800	7480	-4.10
Bajra	2775	2275	-18.02
Ragi	4886	3290	-32.66
Sunflower	7721	7683	-0.49

All the commodities are currently going below MSP during this week.

Details of each Segment

1. RAINFALL

- During the week (28 May – 03 June 2026), lower rainfall was observed, as compared to Long Period Average (LPA) by 10%. Cumulative seasonal rainfall (01st March to 31 May 2026) is higher than LPA by 1%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- Rainfall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Overall, rainfall is likely to be below normal over the entire country except Konkan & Goa, Madhya Maharashtra, Marathwada, Karnataka, Telangana, Andhra Pradesh, where it will be near normal to above normal during the week.

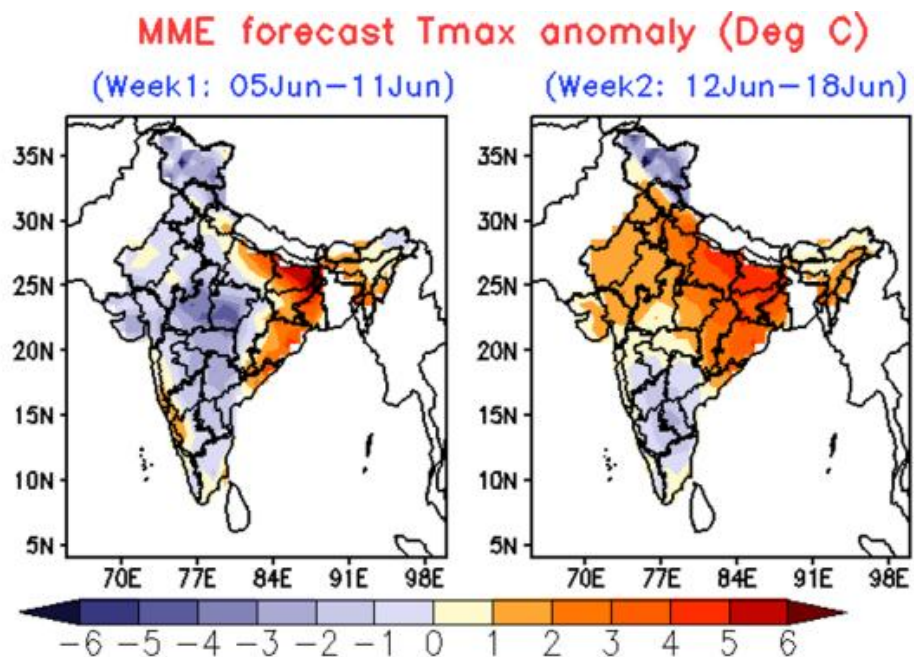

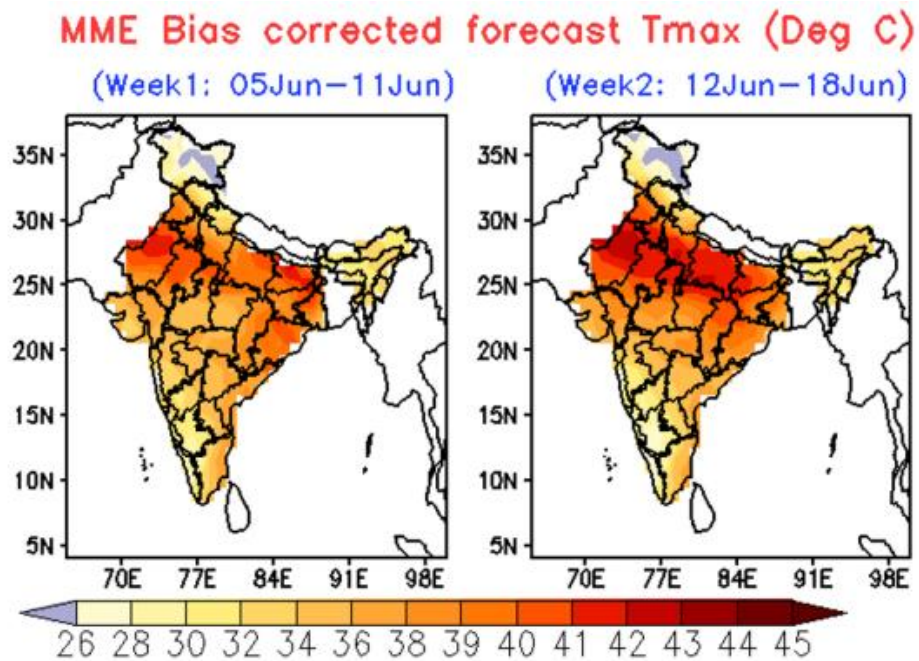

TEMPERATURE: MIN & MAX

Week 1 (05 June - 11 June 2026):

- Gradual fall by 2-4°C in maximum temperatures likely over many parts of Northwest India during 04th -06th June and gradual rise by 3-5°C during 07th-09th June.
- No significant change in maximum temperatures likely over East India till 10th June except Bihar where rise in maximum temperature by 2-3°C till 06th June.

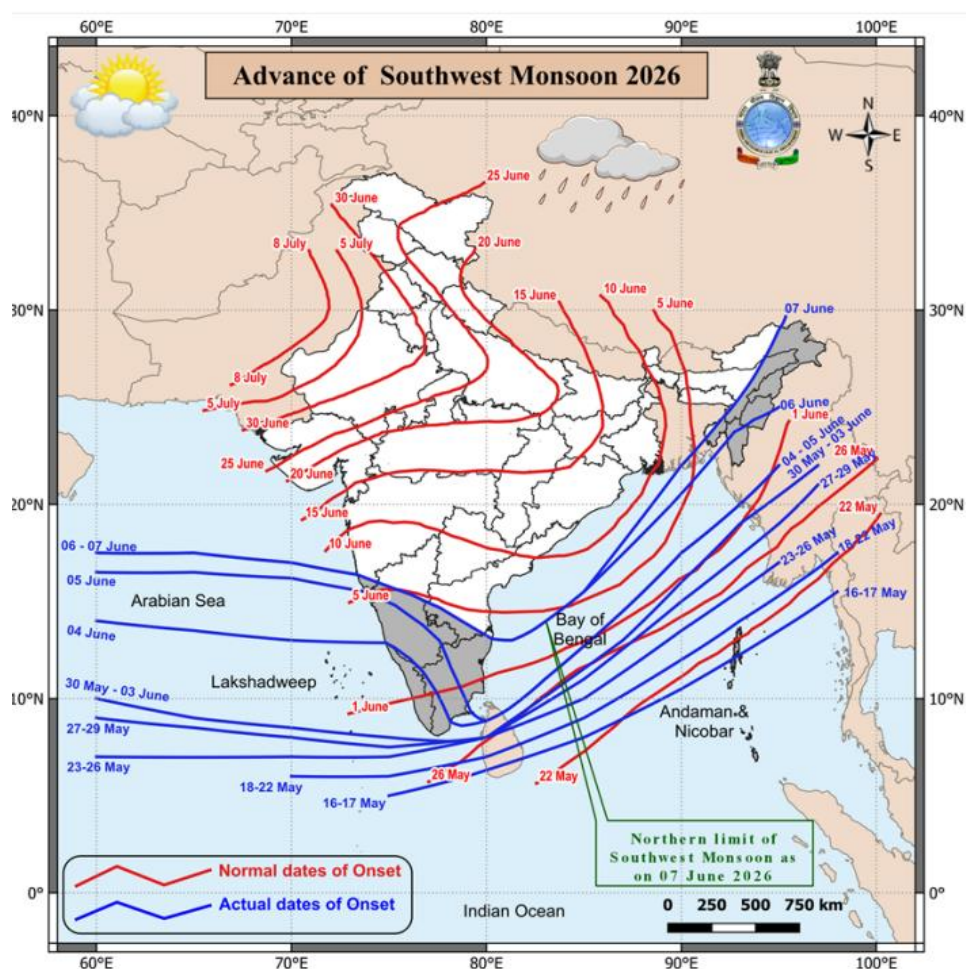

Week 2 (12 June - 18 June 2026):

- Maximum temperatures **is likely to be above normal NW India, East India, NE India, Central India and Gujarat.**
- Low probability of Heatwave conditions likely over parts of northwest India (Uttar Pradesh) and parts of East India (Bihar, Jharkhand, Odisha, Gangetic West Bengal & Chhattisgarh) and adjoining central India (Madhya Pradesh) on some days of the week.
- Above-normal (+1.6 to +3.0°C) to appreciably above-normal (+3.1 to +5.0°C) maximum temperatures are likely in parts of East India and the plains of northwest India, and above-normal maximum temperatures (+1.6 to +3.0°C) are likely over parts of northeast India. Near-normal weekly maximum temperatures (-1.5 to +1.5°C) are likely across the rest of the country during the week.

Advance of Southwest Monsoon 2026:

- The Northern Limit of Monsoon passes through 17.5°N/60°E, 17.5°N/65°E, 17°N/70°E, Devgad, Koppal, Ananthapuramu, Chennai, 15.5°N/85°E, 22°N/90.0°E, Kailashahar, Lamding, North Lakhimpur and 29°N/95°E.
- Conditions are favourable for further advance of southwest monsoon into some more parts of central Arabian Sea, Maharashtra, Karnataka, some parts of Telangana, some more parts of Andhra Pradesh, remaining parts of Tamil Nadu & southwest Bay of Bengal and some more parts of westcentral & northwest Bay of Bengal, some parts of Chhattisgarh & Odisha, remaining parts of Northeastern states and some parts of Sub-Himalayan West Bengal & Sikkim during next 3-4 days.

2. CROPS

Kharif Crops - Area coverage

- **Sugarcane:** About 54.08 lakh ha area coverage under Sugarcane has been reported, which is the same as the area reported during the corresponding period of last year (54.08 lakh ha).
- **Cotton:** About 7.51 lakh ha area coverage has been reported compared to 9.72 lakh ha during the corresponding period of last year.
- **Jute:** About 6.18 lakh ha area coverage has been reported compared to 6.08 lakh ha during the corresponding period of last year.

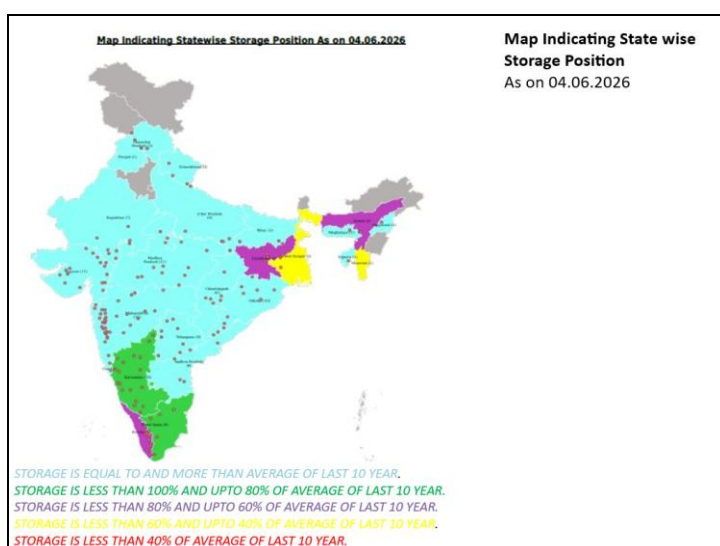

Progress of area coverage under Kharif crops as on 05.06.2026						
Area: In lakh hactare						
S. No.	Crop	Normal Area (2020-21 to 2024-25)	Final Area Coverage 2025	Area Sown		Increase(+)/ Decrease(-) over 2025

3. RESERVOIR STORAGE

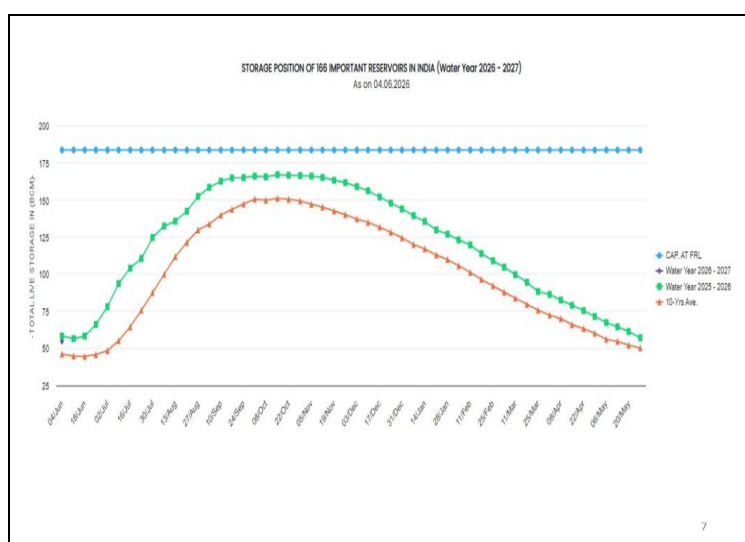

As on 04 June, 2026, the current live storage in 166 reservoirs was 54.726 BCM (29.81%) of total live capacity of 183.565 BCM.

- 125 reservoirs having storage more than 80% of normal storage.
- 16 reservoirs having storage 51% to 80%.
- 25 reservoirs having storage upto 50%.

The status for 166 major reservoirs of the country			
Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	30	94	119
Last Week	31	111	119

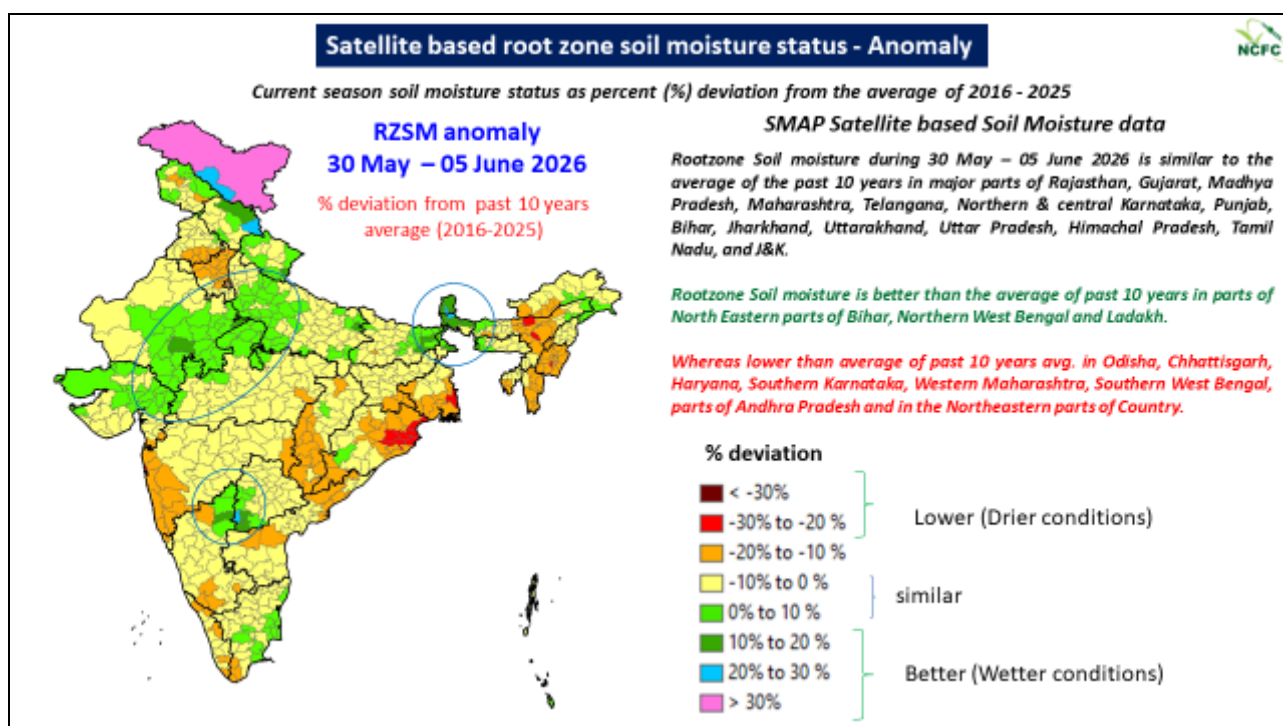

Source: CWC

4. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

Soil Moisture Observation

- Soil moisture during 30 May – 05 June 2026 is similar to the average of the past 10 years in major parts of Rajasthan, Gujarat, Madhya Pradesh, Maharashtra, Telangana, Northern and Central Karnataka, Punjab, Bihar, Jharkhand, Uttarakhand, Uttar Pradesh H.P., Tamil Nadu and J & K.
- Soil moisture is better than the average of the past 10 years in parts of Northeastern parts of Bihar, Northern West Bengal and Ladakh.
- It was lower than average of past 10 years in pockets of Odisha, Chhattisgarh, Haryana, Southern Karnataka, Western Maharashtra, Southern West Bengal, parts of Andhra Pradesh and in the Northeastern parts of Country

5. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Kharif 2026 as on 05.06.2026 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2026	Requirement during June, 2026	(as on 05/06/26)		
			Availability	Sales	Closing stock
UREA	194.02	35.64	108.98	41.03	67.95
DAP	59.17	10.85	27.99	10.36	17.63
MOP	17.57	3.32	11.21	2.81	8.40
NPK	84.99	16.33	65.37	18.95	46.42
SSP	34.81	6.69	31.64	7.60	24.04
TOTAL	390.56	72.83	245.18	80.75	164.44

- In case of DAP, The opening stock of Kharif 2026 as compared to the opening stock of Kharif 2025 is more by 11.78 LMT
- As on 5th June, 2026 the availability of DAP is 27.99 LMT against the requirement of 10.85 LMT during the ongoing Kharif 2026 season.
- As on 05th June 2026, adequate stock of Urea (108.98 LMT), DAP (27.99 LMT), MOP (11.21 LMT), NPK (65.37 LMT) and SSP (31.64 LMT) is available.
- .

6. PEST & DISEASE

- The overall intensity of pests and diseases remained below the Economic Threshold Level.
