Weekly report/ Minutes of the Crop Weather Watch Group (CWWG) meeting as on 29.06.2026

Key Insights

1. Kharif Season Sowing Status:

- Kharif sowing data collection has started from 05th June, 2026 and the sowing is in preliminary stage. As on 25 June 2026, the area sown under Kharif crops is 182.72 lakh ha (including 57.31 lakh ha in Sugarcane) as compared to 236.46 lakh ha during the corresponding period of last year.

2. Weather Update:

- a) Temperature: Maximum temperature is likely to be above normal in Chhattisgarh, Odisha, East & West UP, Haryana-Chandigarh-Delhi, Himachal Pradesh, East MP, Saurashtra & Kutch and Vidarbha.
- b) Rainfall Distribution: From June 01– 24 June 2026, the All-India cumulative rainfall is 42% lower than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: (-) 41%; (ii) Northwest India: -22%; (iii) Central India: -59%; and South Peninsula: -28%.
 - Very heavy to extremely Heavy rainfall likely over northeast India and over Sub-Himalayan till 30th June and Goa, Konkan, Madhya Maharashtra & Vidarbha, Karnataka and MP till 5 July 2026.
 - Moderate to severe thunderstorm activity accompanied by gusty winds, with moderate to severe Lightning activity is likely over North India, Jharkhand, Odisha, Marathwada and some parts of North-west India.
 - Heat wave conditions likely over Bihar, Uttar Pradesh, Haryana, Chandigarh and Delhi till 30th June 2026.
 - The seasonal trough at mean sea level from Punjab to Bihar now runs Punjab to Gangetic West Bengal across Haryana, Uttar Pradesh and Bihar.
 - Overall, rainfall activity is likely to remain below normal over most parts of the country. A fresh Western Disturbance is likely to affect Northwest India from 2nd July 2026.

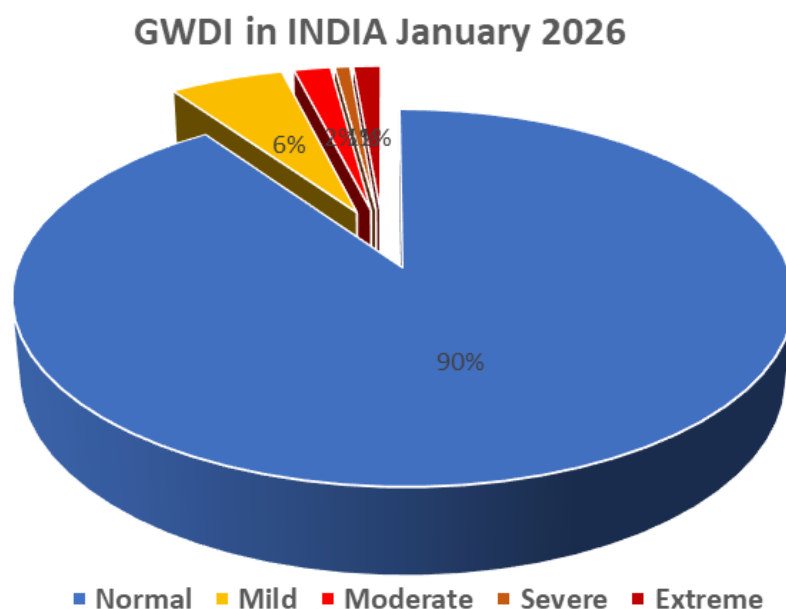

3. Inputs Situation

- a) **Water Reservoir Status:** As on 25 June 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 48.405 billion cubic meter, which is 26.37% of total live storage capacity (183.565 BCM). The current year's storage is nearly 73.21 percent of last year's storage and 105.67 percent of the average storage of the last ten years during the corresponding period. The overall storage position is less than the corresponding period of last year in the country as a whole but is better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.

The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.

About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.

The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, and Nagaland.

c) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases:** Intensity of pests and diseases at some fields has been reported to be above Economic Threshold Level for Maize -vegetative stage (Downy mildew (*Peronosclerospora sorghi*)) in Karnataka. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out. The overall intensity of pests and diseases remained below the Economic Threshold Level

NOTES :

- RainFall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Overall, the conditions are likely to become favorable for further advance of the Southwest Monsoon during the week.
- Overall, rainfall is likely to be normal to above normal over the entire country during the week

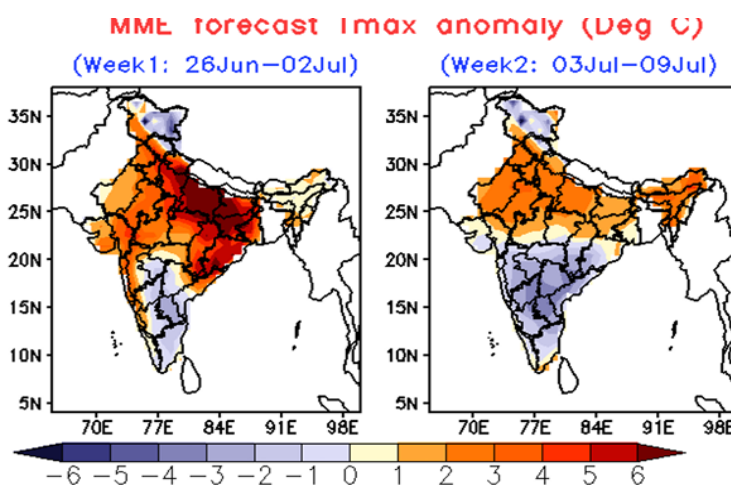

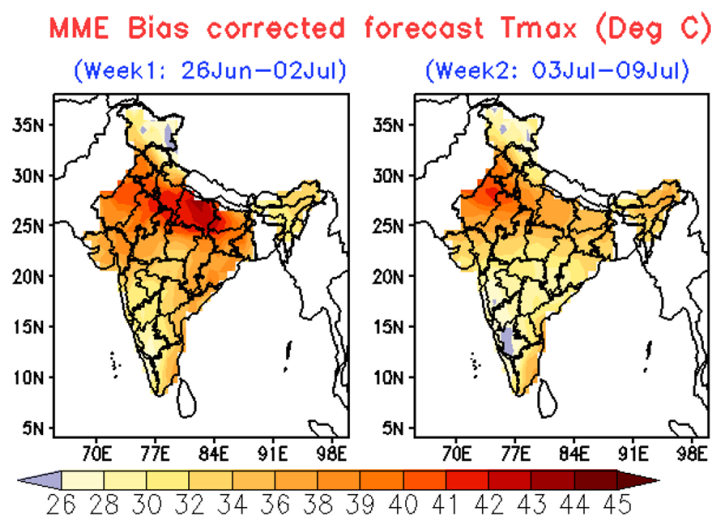

TEMPERATURE: MIN & MAX

Week 1 (25 June - 01 July 2026):

- Maximum temperatures likely to rise by 2-3°C over Northwest India till 28th and fall by 3-5°C thereafter.
- Maximum temperatures likely to rise by 2-4°C over Central India till 28th and no significant change thereafter.
- No significant change in maximum temperatures likely over the rest parts of country till 01st July, 2026.

Week 2 (02 July – 08 July 2026):

- No significant Heatwave conditions are likely over any part of the country during the week.
- Above normal (+1.6 to +3.0°C) maximum temperatures are likely over many parts of the plains of northwest India, and some parts of East India. Near-normal weekly maximum temperatures (-1.5 to +1.5°C) are likely across the rest of the country during week 2.
- No Warm Night conditions are likely over any part of the country during the week. However, minimum temperatures are likely to be above normal (+1.6 to +3.0°C) over parts of northwest India (Punjab, Haryana, Rajasthan, & Uttar Pradesh), and near Normal (-1.5 to +1.5°C) across the rest of the country.

Advance of Southwest Monsoon 2026:

- The Northern Limit of Monsoon continues to pass through 20°N/60°E, 20°N/65°E, 20°N/70°E, Surat, Indore, Mandla, Daltonganj, Motihari and 28.3°N/83°E as on 28th June.

2. CROPS

Kharif Crops - Area coverage

- **Sugarcane:** About 57.31 lakh ha area coverage (106% of Normal area) has been reported compared to 56.64 lakh ha during the corresponding period of last year.
- **Cotton:** About 29.66 lakh ha area coverage has been reported compared to 45.36 lakh ha during the corresponding period of last year.
- **Jute:** About 6.25 lakh ha area coverage has been reported compared to 6.13 lakh ha during the corresponding period of last year.
