- a) **Water Reservoir Status:** As on 11 September 2025, the total live water storage in 161 important reservoirs across the country (monitored by CWC) is 158.765 billion cubic meter, which is 87% of total live storage capacity (182.479 BCM). The current year's storage is nearly 102.5 percent of last year's storage and 114.8 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.

b) Groundwater Levels: About 43.1% of the total monitoring wells show depth to water level in the range of 0 to 5 m below ground level and 37.6% show depth to water level in the range of 5 to 10 m below ground level. About 19.2% of the total monitoring wells show water level deeper than 10 m below ground level. The groundwater level fluctuation analysis of Pre-monsoon 2025 with decadal mean of Pre-monsoon (2015-2024) indicates that 67.7% of analysed wells are showing rise and 33.0% are showing fall in water level. Remaining 0.3% stations analysed do not show any change in water level.

As per the Ground Water Drought Indices (GWDI), in pre-monsoon 2025, 90% of the analysed wells are in the normal category, while 10% of the analysed wells are in the drought category.

c) Seeds and Fertilizers: For Kharif 2025, certified seed availability is 178.64 lakh quintals against a requirement of 164.05 lakh quintals, ensuring a surplus of 14.60 lakh quintals. The fertilizer supply remains stable across all products.

4. Pests & Diseases: Intensity of pests and diseases at some fields has been reported to be above Economic Threshold Level for Soyabean (Girdle Beetle & Tobacco Caterpillar) in Maharashtra & Soyabean (Variety RBS 2001-4) (Soyabean Yellow Mosaic Virus)) in Madhya Pradesh and for Paddy (US 312) (Caseworm)) in Jharkhand. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out.
