

## CROP WEATHER WATCH GROUP (CWWG) WEEKLY REPORT

(as on 01.09.2025)

### Key Insights

1. **Kharif Sowing Status:** As on 29 August, 2025, the area sown under Kharif crops is 1092.87 lakh ha as compared to 1060.36 lakh ha during the corresponding period of last year. About 99.6 percent of the normal area has been sown under the Kharif season crops. The status of sowing under Rice, Pulses, Coarse Cereals and Sugarcane is better than in the same period of last year.
2. **Weather Update:**
  - a) **Temperature:** Maximum temperatures is likely to be above normal over North East India, Bihar and adjoining regions of East Uttar Pradesh and below normal over rest of the country.
  - b) **Rainfall Distribution:** From June 01- Sept 01 2025, the All-India cumulative rainfall is 7% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: (-)18%; (ii) Northwest India: 30%; (iii) Central India: 9%; and South Peninsula: 10%.
    - Heavy to very Heavy rainfall spell likely to continue over Northwest India during next 3 days with isolated Extremely heavy rainfall over Himachal Pradesh during 1st to 03<sup>rd</sup> September and Uttarakhand on 01<sup>st</sup> September.
    - Isolated heavy to very heavy over Jammu during 1<sup>st</sup> to 02<sup>nd</sup> September & isolated Extremely Heavy rainfall on 02<sup>nd</sup> September, 2025.
    - Heavy to very heavy rainfall likely to continue over Konkan & Goa, Madhya Maharashtra, Gujarat Region and Coastal Karnataka during next 7 days with possibility of Extremely heavy rainfall at isolated places over Gujarat during 04<sup>th</sup> 06<sup>th</sup> September.
    - Scattered to Fairly widespread rainfall likely over northern, western India, western peninsular and eastern India.

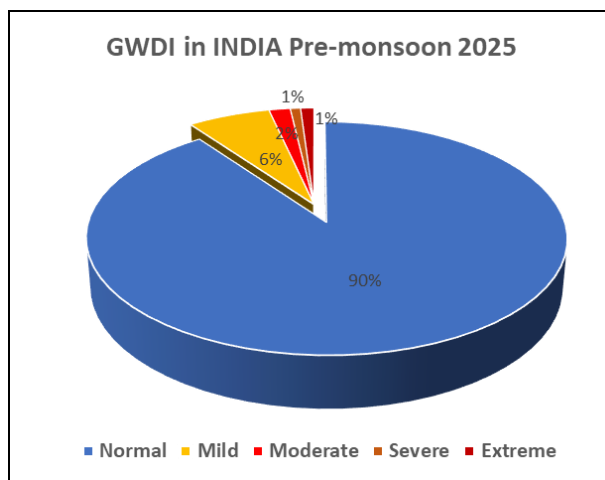

*District-wise rainfall distribution of States is attached in Annexure I.*

### 3. Inputs Situation

- a) **Water Reservoir Status:** As on 28<sup>th</sup> August 2025, the total live water storage in 161 important reservoirs across the country (monitored by CWC) is 152.31 billion cubic meter, which is 83% of total live storage capacity (182.479 BCM). The current year's storage is nearly 106.7 percent of last year's storage and 121 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** About 43.1% of the total monitoring wells show depth to water level in the range of 0 to 5 m below ground level and 37.6% show depth to water level in the

range of 5 to 10 m below ground level. About 19.2% of the total monitoring wells show water level deeper than 10 m below ground level. The groundwater level fluctuation analysis of Pre-monsoon 2025 with decadal mean of Pre-monsoon (2015-2024) indicates that 67.7% of analysed wells are showing rise and 33.0% are showing fall in water level. Remaining 0.3% stations analysed do not show any change in water level.

As per the Ground Water Drought Indices (GWDI), in pre-monsoon 2025, 90% of the analysed wells are in the normal category, while 10% of the analysed wells are in the drought category.

c) **Seeds and Fertilizers:** For Kharif 2025, certified seed availability is 178.64 lakh quintals against a requirement of 164.05 lakh quintals, ensuring a surplus of 14.60 lakh quintals. The fertilizer supply remains stable across all products.

4. **Pests & Diseases:** Intensity of pests and diseases at some fields has been reported to be above Economic Threshold Level for Rice (Varieties: PR 114, PR 126 & PR 131) (Southern Rice Black Streaked Dwarf Virus (SRBSDV)) in Haryana & (Swarming Caterpillar and Leaf folder) in Assam, for Cotton (Pink ball worm, Angular leaf spot/Bacterial leaf blight) in Haryana and for Green Gram (White Grub) in Rajasthan. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out. The overall intensity of pests and diseases remained below the Economic Threshold Level.

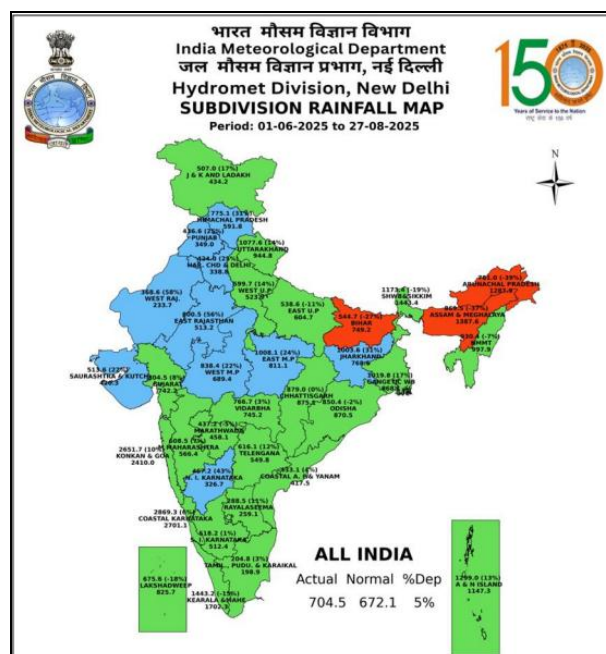

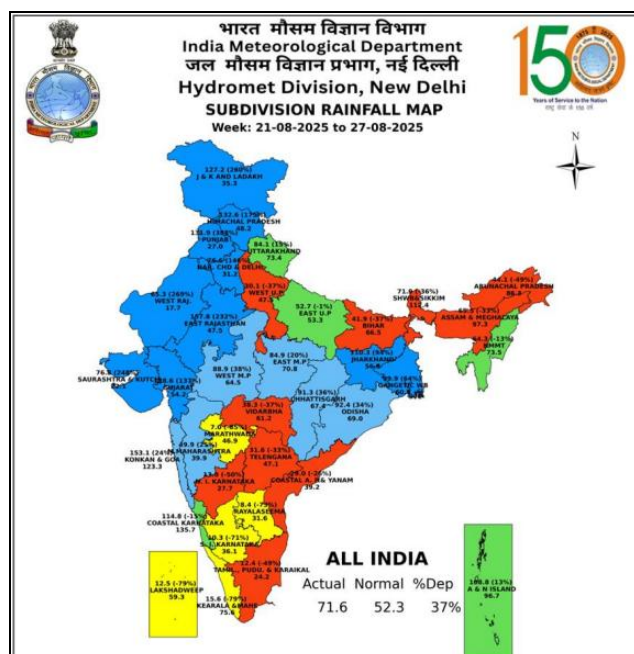

#### 5. **Crops whose Mandi Wholesale prices are below MSP:**

| All India Mandi Wholesale Prices |              |                        |                      |
|----------------------------------|--------------|------------------------|----------------------|
| Commodities                      | MSP (RS/Qtl) | Price as on 29.08-2025 | % Variation over MSP |
| Rice (un milled)                 | 2300         | 2229                   | -3.09                |
| Arhar whole                      | 7550         | 6342                   | -16.00               |
| Moong whole                      | 8682         | 7632                   | -12.09               |
| Urad                             | 7400         | 6947                   | -6.12                |
| Groundnut                        | 6783         | 5763                   | -15.04               |
| Soyabean                         | 4892         | 4348                   | -11.12               |

## Details of each Segment

### 1. RAINFALL

- During the week (14 Aug - 27 Aug 2025), higher rainfall was observed, as compared to Long Period Average (LPA) by 37%. Cumulative seasonal rainfall (01<sup>st</sup> June to 27<sup>th</sup> Aug 2025) is higher than LPA by 5%.

#### Legend

Large Excess [ 60% or more] Excess [ 20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

#### NOTES :

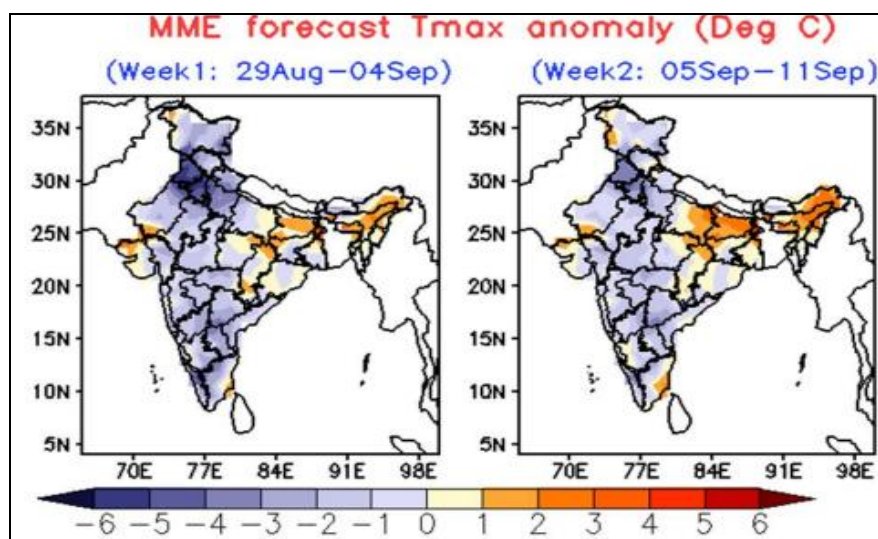

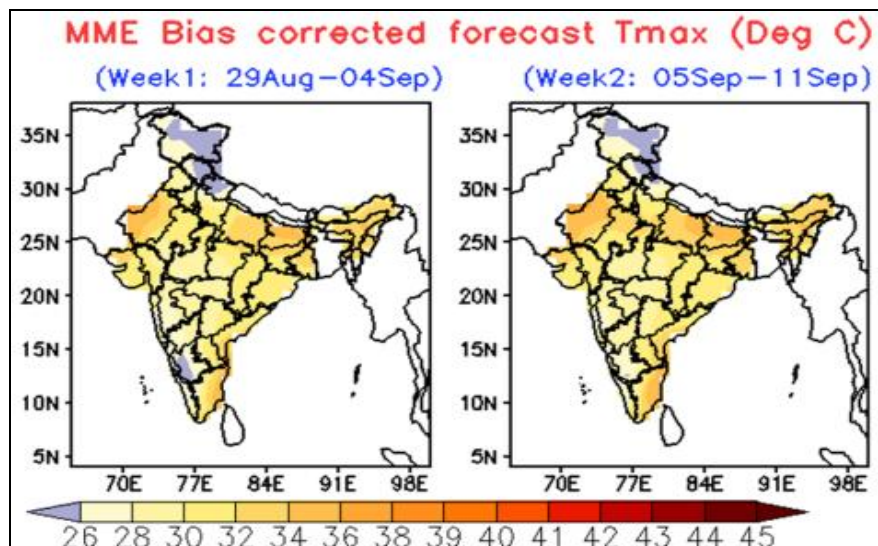

- RainFall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

### Rainfall Forecast:

- The monsoon trough at mean sea level now passes through Bikaner, Gwalior, Satna, Pendra Road, Puri and thence to eastwards to eastcentral Bay of Bengal.

Overall, rainfall activity is likely to be normal to above normal over most parts of northwest & central India; near normal over most parts of east & northeast; below normal over many parts of south Peninsular India during the week

## 2. TEMPERATURE: MIN & MAX

### Temperature

#### Week 1 (29 Aug - 04 September 2025):

- Overall, maximum temperatures are likely to be near normal or below normal over most parts of the country except some parts of east & northeast India, where these are likely to be slightly above normal by about 2°C during the week.

#### Week 2 (05 Sept - 11 September 2025):

- Maximum temperatures are likely to be near normal or below normal over most parts of the country except many parts of east & northeast India, where these are likely to be above normal by 2-3°C during the week.

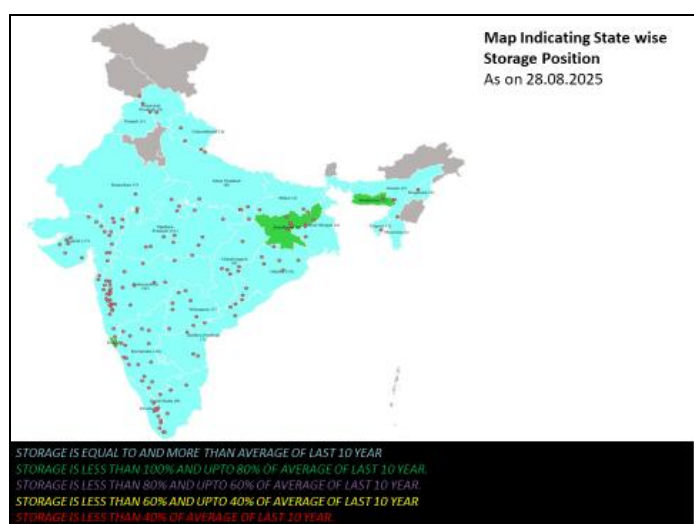

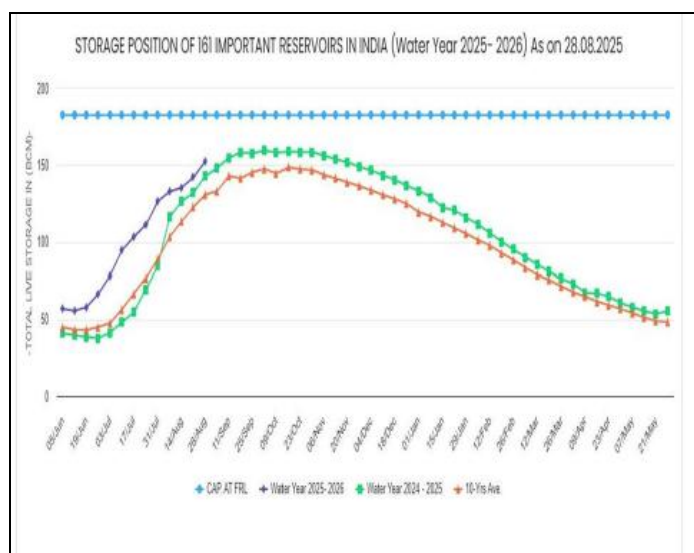

### 3. RESERVOIR STORAGE (as on 21<sup>st</sup> August, 2025)

Current live storage in 161 reservoirs was 152.31 BCM (83%) of total live capacity of 182.479 BCM.

Table 1: For 161 major reservoirs of the country

- 150 reservoirs having storage more than 80% of normal storage.
- 10 reservoirs having storage 51% to 80%.
- 01 reservoirs having storage upto 50%.

| Period       | Storage as % of FRL | Storage as % of Last Year | Storage as % of 10 Year's Average Level |
|--------------|---------------------|---------------------------|-----------------------------------------|
| Current Week | 83                  | 107                       | 121                                     |
| Last Week    | 78                  | 108                       | 120                                     |

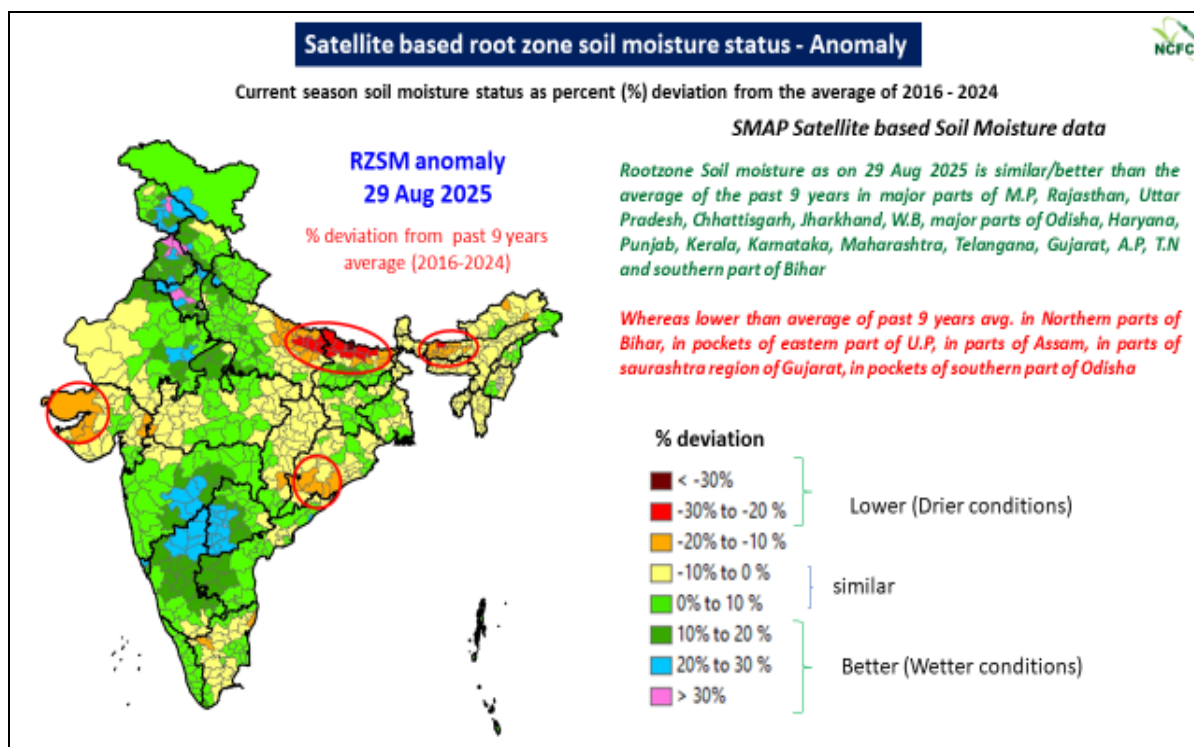

Source: CWC

## 4. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

### Soil Moisture Observation

- Soil moisture as on 29 August 2025 was similar/better than the average of the past 9 years in major parts of M.P, Rajasthan, Uttar Pradesh, Chhattisgarh, Jharkhand, West Bengal, major parts of Odisha, Haryana, Punjab, Kerala, Karnataka, Maharashtra, Telangana, Gujarat, A.P., Tamil Nadu and southern parts of Bihar.
- It was lower than average of past 9 years in northern parts of Bihar, in pockets of eastern part of UP, in parts of Assam, in parts of Saurashtra region of Gujarat, in pockets of southern parts of Odisha.

## 5. CROP SOWING STATUS FOR KHARIF SEASON

### Kharif Crops - Area coverage

- **Rice:** About 431.96 lakh ha (107.2% of Normal) area coverage under Kharif Rice as compared to 405.34 lakh ha during the corresponding period of last year.
- **Moong:** About 34.11 lakh ha (95.6% of Normal) area coverage under Moong as compared to 33.96 lakh ha during the corresponding period of last year.
- **Soybean:** About 120.28 lakh ha (94.6% of Normal) area coverage under Soyabean has been reported as compared to 125.50 lakh ha during the corresponding period of last year.
- **Sugarcane:** About 57.31 lakh ha area coverage under Sugarcane has been reported as compared to 55.68 lakh ha during the corresponding period of last year.
- **Cotton:** About 108.77 lakh ha (84% of Normal) area coverage has been reported compared to 111.39 lakh ha during the corresponding period of last year.

- The above data indicates that the availability of Urea, MOP, Complexes and SSP is comfortable.
- In case of DAP, the opening stock of Kharif 2025 as compared to the opening stock of Kharif 2024 is less by 8.6 LMT
- As on 28<sup>th</sup> August, 2025 the availability of DAP is 25.96 LMT against the requirement of 9.19 LMT during the ongoing Kharif 2025 season.

## 7. PEST & DISEASE

- Over all intensity of pests and disease remained below Economic Threshold Level (ETL) except:
