

Government of India
Ministry of Agriculture & Farmers Welfare
Department of Agriculture & Farmers Welfare

**Weekly report/ Minutes of the Crop Weather Watch Group
(CWWG) meeting as on 22.06.2026**

Key Insights

1. Kharif Season Sowing Status:

- Kharif sowing data collection has started from 05th June, 2026 and the sowing is in preliminary stage. As on 19 June 2026, the area sown under Kharif crops is 119.90 lakh ha (including 57.31 lakh ha in Sugarcane) as compared to 117.95 lakh ha during the corresponding period of last year.

2. Weather Update:

- a) Temperature: Maximum temperature is likely to be above normal in Madhya Maharashtra, East India, Rajasthan and many parts of Northeast India.
- b) Rainfall Distribution: From June 01– 14 June 2026, the All-India cumulative rainfall is 8% lower than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: (-) 40%; (ii) Northwest India: 13%; (iii) Central India: (-) 55%; and South Peninsula: (-) 4%.
 - The seasonal trough at mean sea level from Punjab to Bihar across Haryana and Uttar Pradesh persists.
 - Very heavy to extremely Heavy rainfall likely over northeast India till 25th and over Sub-Himalayan West Bengal & Sikkim till 22nd June. 2026.
 - Moderate to severe thunderstorm activity accompanied by squally winds, with moderate to severe Lightning activity is likely over East India, Chhattisgarh, and Rajasthan during the next two days.
 - Duststorm activity likely over West Rajasthan on 22nd June.
 - Heat wave to severe Heat wave conditions likely over Vidarbha, East Madhya Pradesh, and East Uttar Pradesh for next 4-5 days and Heat Wave conditions over Chhattisgarh for next 3 days and Telangana for next 2 days.
 - Overall, rainfall activity is likely to remain below normal over most parts of the country except some parts of south peninsular India and north-east India where it will be near normal during the week.

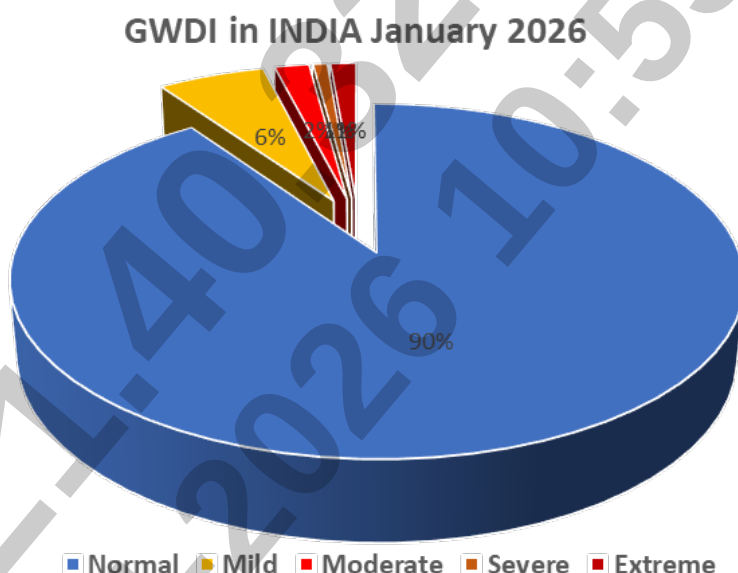

3. Inputs Situation

- a) **Water Reservoir Status:** As on 18 June 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 50.457 billion cubic meter, which is 27.49% of total live storage capacity (183.565 BCM). The current year's storage is nearly 86.62 percent of last year's storage and 113.02 percent of the average storage of the last ten years during the corresponding period. The overall storage position is less than the corresponding period of last year in the country as a whole but is better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.

The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.

About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.

The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, and Nagaland.

c) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases:** Intensity of pests and diseases at some fields has been reported to be above Economic Threshold Level for Maize -vegetative stage (Downy mildew (*Peronosclerospora sorghi*)) in Karnataka. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out. The overall intensity of pests and diseases remained below the Economic Threshold Level

5. Crops whose Mandi Wholesale prices are below MSP:

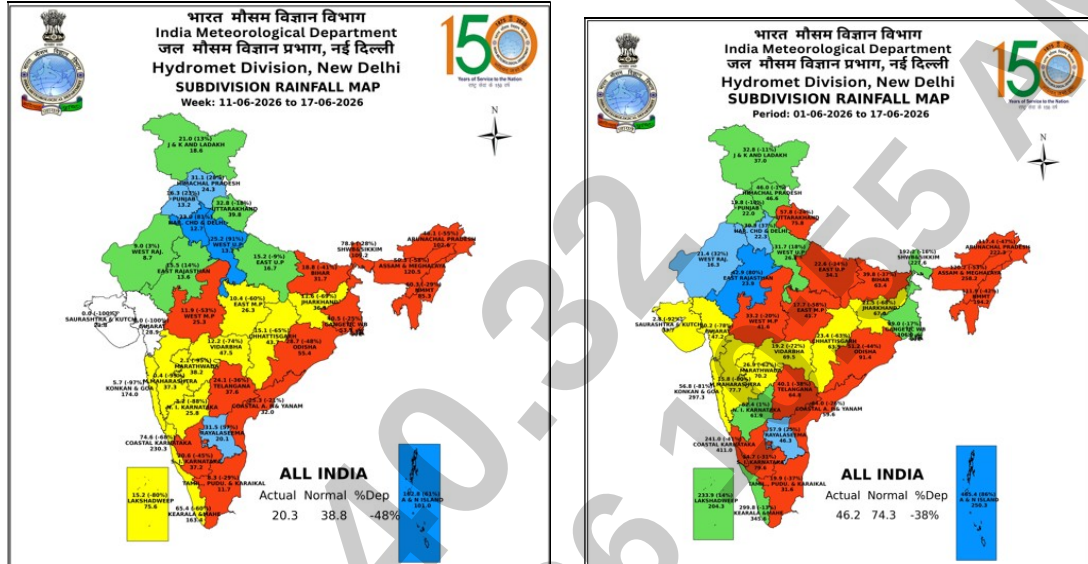

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 19-06-2026	% Variation over MSP
Paddy (Rice unmilled)	2369	2307	-2.62
Wheat	2585	2432	-5.92
Maize	2400	1853	-22.79
Arhar	8000	7441	-6.99
Gram whole	5875	5610	-4.51
Masur	7000	6818	-2.60
Moong	8768	6711	-23.46
Bajra	2775	2131	-23.21
Ragi	4886	3529	-27.77
Groundnut	7263	7130	-1.83
Sunflower	7721	7710	-0.14

All the commodities are currently going below MSP during this week.

Details of each Segment

1. RAINFALL

- During the week (11 June – 17 June 2026), lower rainfall was observed, as compared to Long Period Average (LPA) by 48%. Cumulative seasonal rainfall (01st June to 17 June 2026) is lower than LPA by 38%.

Rainfall Forecast:

- Overall, weaker southwest monsoon conditions are likely to prevail over the country during the Week.
- Overall, rainfall activity is likely to remain below normal over most parts of the country during the week.

TEMPERATURE: MIN & MAX

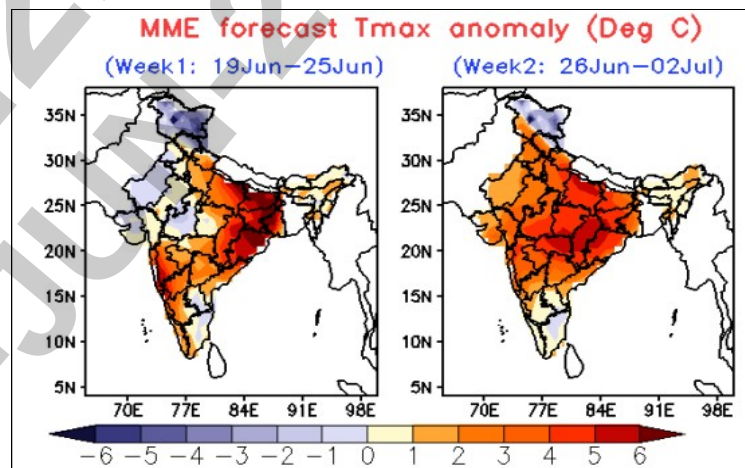

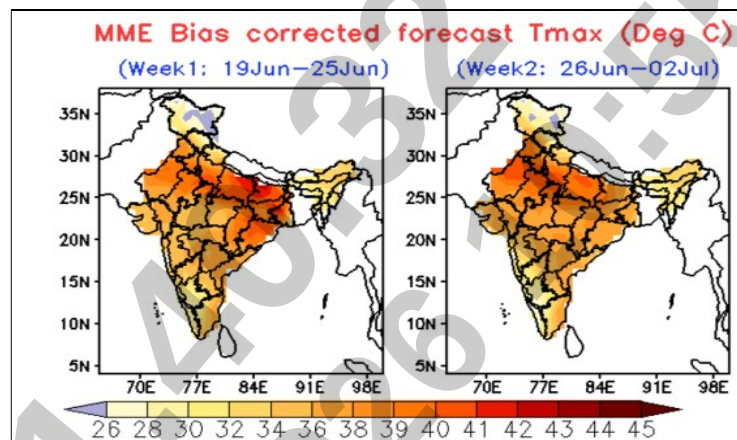

Week 1 (19 June - 25 June 2026):

- Gradual fall in maximum temperatures by about 2°C likely over Northwest India till 22nd June 2026, gradual rise by 2- 3°C for subsequent 3 days and no significant change thereafter.
- No significant change in maximum temperatures likely over Maharashtra till 21th June and gradual fall by 2-3°C thereafter.

- Heat wave conditions very likely in isolated pockets over Chhattisgarh on 22nd & 23rd June; East Madhya Pradesh, Vidarbha during 22nd-25th June, East Uttar Pradesh during 22nd-24th June; Telangana on 22nd June; with severe heat wave conditions in isolated pockets during 22nd-24th June.

Week 2 (26 June – 02 July 2026):

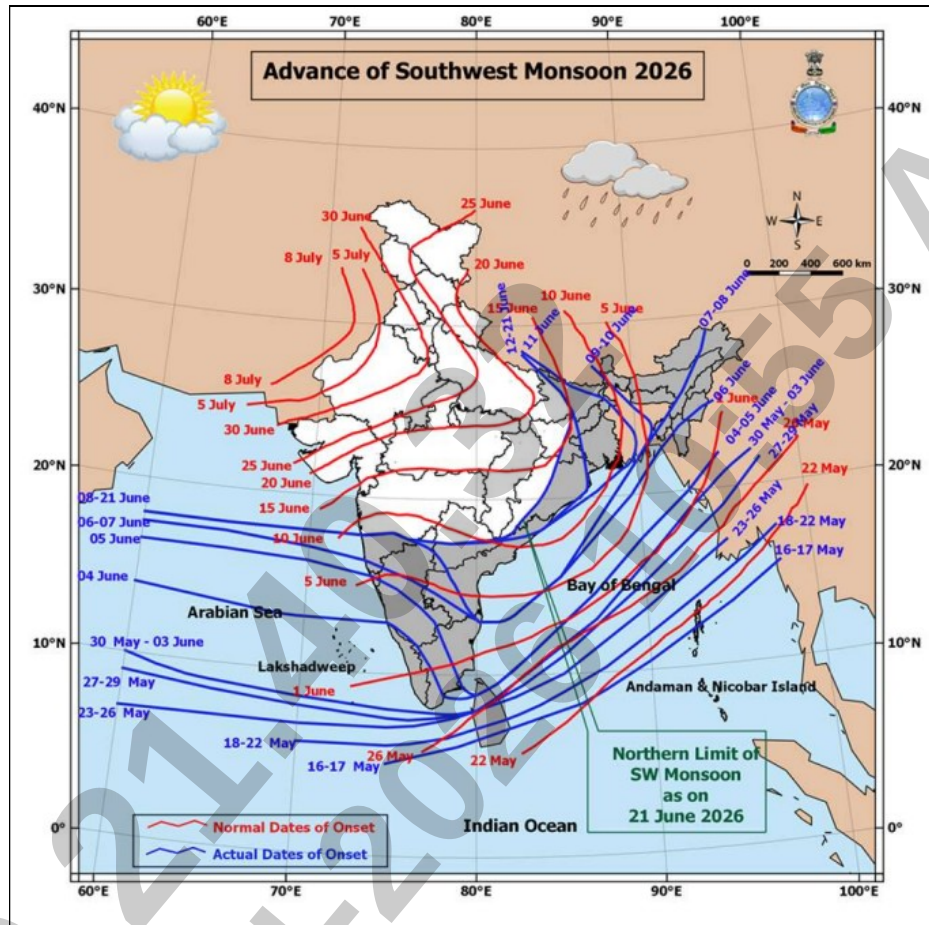

- Low probability of Heatwave conditions likely over parts of northwest India (Rajasthan, Punjab, Haryana & Uttar Pradesh), and central India (Vidarbha and adjoining regions of North Telangana) on some days of week.
- Above normal (+1.6 to +3.0°C) maximum temperatures are likely over many parts of the plains of northwest India, central India, north peninsular India, and East India. Near-normal weekly maximum temperatures (-1.5 to +1.5°C) are likely across the rest of the country during the week.

Advance of Southwest Monsoon 2026:

- The Northern Limit of Monsoon continues to pass through 18°N/60°E, 18°N/65°E, 18°N/70°E, Harnai, Solapur, Hyderabad, Bhadrachalam, Koraput, Phulbani, Ranchi, Jamui, Muzaffarpur and 28.3°N/83°E.

- Conditions are favourable for further advance of southwest monsoon into some more parts of Maharashtra, Telangana, Odisha, Jharkhand & Bihar, and some parts of Chhattisgarh around 23rd June, 2026.

2. CROPS

Kharif Crops - Area coverage

- **Sugarcane:** About 57.31 lakh ha area coverage (106% of Normal area) has been reported compared to 56.64 lakh ha during the corresponding period of last year.
- **Cotton:** About 17.13 lakh ha area coverage has been reported compared to 22.82 lakh ha during the corresponding period of last year.
- **Jute:** About 6.22 lakh ha area coverage has been reported compared to 6.09 lakh ha during the corresponding period of last year.

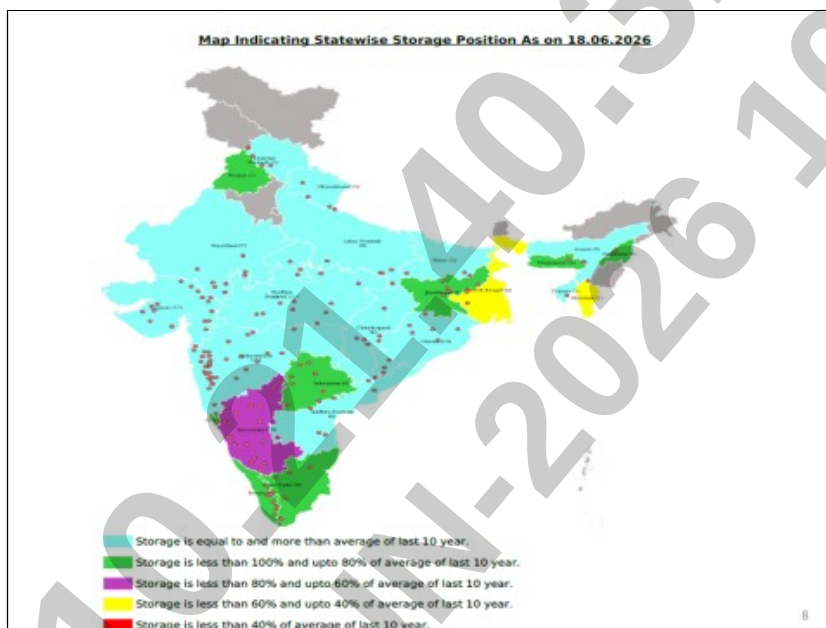

Progress of area coverage under Kharif crops as on 19.06.2026						
Area: In lakh hactare						
S. No.	Crop	Normal Area (2020-21 to 2024-25)	Final Area Coverage 2025	Area Sown		Increase(+)/ Decrease(-) over 2025

3. RESERVOIR STORAGE

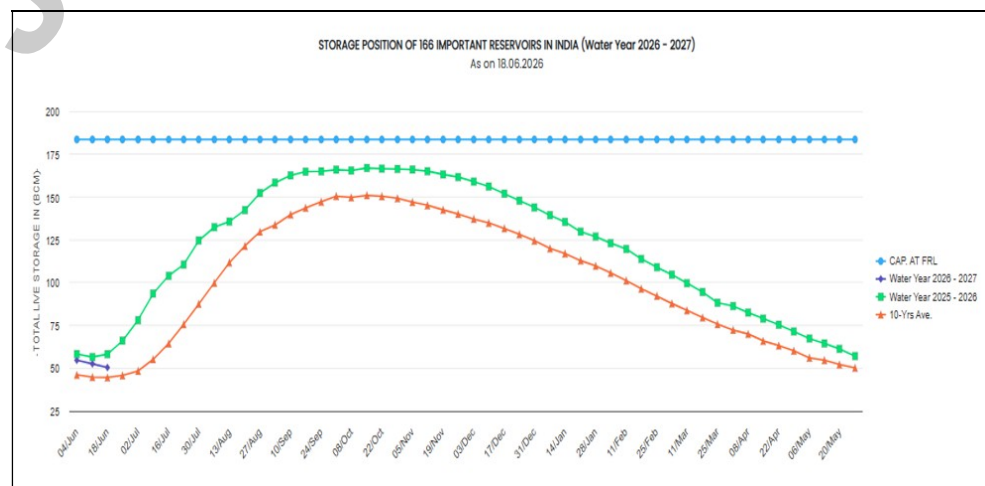

As on 18 June, 2026, the current live storage in 166 reservoirs was 50.457 BCM (27.49%) of total live capacity of 183.565 BCM.

- 122 reservoirs having storage more than 80% of normal storage.
- 119 reservoirs having storage 51% to 80%.
- 25 reservoirs having storage upto 50%.

The status for 166 major reservoirs of the country			
Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	27	87	113
Last Week	28	92	116

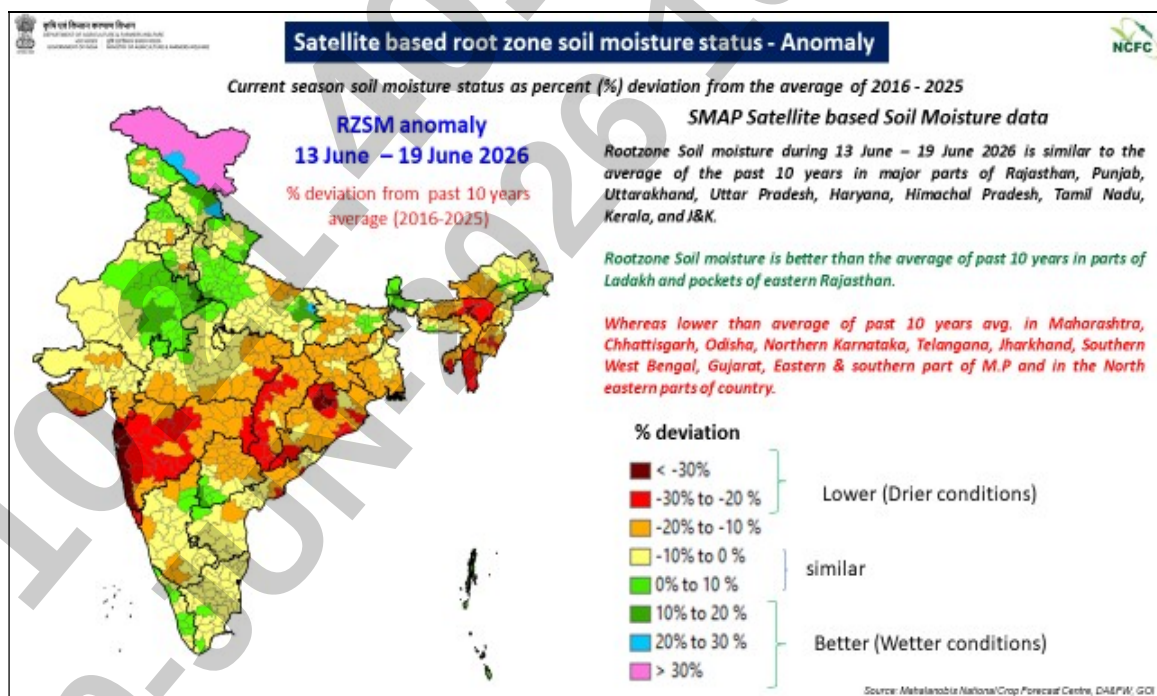

Source: CWC

4. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

Soil Moisture Observation

- Soil moisture during 13 June – 19 June 2026 is similar to the average of the past 10 years in major parts of Rajasthan, Punjab, Uttarakhand Uttar Pradesh, Haryana, Himachal Pradesh, Tamil Nadu, Kerala and J & K.
- Soil moisture is better than the average of the past 10 years in parts of Ladakh and pockets of eastern Rajasthan.
- It was lower than average of past 10 years in pockets of Maharashtra, Chhattisgarh, Odisha, Northern Karnataka, Telangana, Jharkhand, Southern West Bengal, Gujarat, Eastern & southern parts of MP and in the Northeastern parts of Country.

5. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Kharif 2026 as on 19.06.2026 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2026	Requirement during June, 2026	(as on 19/06/26)		
			Availability	Sales	Closing stock
UREA	190.32	34.96	124.43	56.48	67.95
DAP	56.23	10.92	30.88	14.35	16.53
MOP	17.57	3.32	12.45	3.64	8.81
NPK	84.99	16.33	71.98	26.60	45.38
SSP	34.81	6.69	34.48	11.16	23.32
TOTAL	383.92	72.22	274.22	112.23	161.99

- In case of DAP, The opening stock of Kharif 2026 as compared to the opening stock of Kharif 2025 is more by 11.78 LMT
- As on 19th June, 2026 the availability of DAP is 30.88 LMT against the requirement of 10.92 LMT during the ongoing Kharif 2026 season.
- As on 19th June 2026, adequate stock of Urea (124.43 LMT), DAP (30.88 LMT), MOP (12.45 LMT), NPK (71.98 LMT) and SSP (34.48 LMT) is available.

6. PEST & DISEASE

- The overall intensity of pests and diseases remained below the Economic Threshold Level except:

फसल Crop	राज्य State	जिला/उपजिला/गांव District/ Sub District/ Village	स्रोत/ Source	कीट रोग Pest Disease	राज्य में फसल के अंतर्गत कुल क्षेत्रफल (हेक्टेयर) Total area under the crop in the state (ha)	तीव्रता Intensity	की गई कार्रवाई/टिप्पणी Action Taken/ Remark
						संक्रमित/प्रभावि तक्षेत्र *ETL (हेक्टेयर) से ऊपर /Area infested/Infected above *ETL (ha)	
Maize (Vegetative stage)	Karnataka	Mysuru/ HD Kote/ Manuganahalli	RCIPMC and SAD	Downy mildew (Peronosclerospora sorghi)	13,00,000	94	- Pest incidence was reported on 18.06.2026 - RCIPMC, Bengaluru conducted Joint Survey with State Agriculture Department, Karnataka. - Survey team issued advisory through NPSS, WhatsApp group among the farmers. - Regular monitoring is being carried out by all field functionaries as follow up action.

Analysis of CPI and WPI for the month of May, 2026

1. Inflation Scenario for the Month of May, 2026 (based on WPI)

The annual rate of inflation based on All India Wholesale Price Index (WPI) number is 9.68% (provisional) for the month of May, 2026 (over May, 2025).

2. WPI FOOD INDEX (Weight 24.99%)

The Food Index consists of 'Food Articles' from Primary Articles major group, and 'Manufacture of Food Products' from Manufactured Products major group. It observed a YoY inflation of 4.49 per cent in May 2026, compared to 3.11 per cent in April 2026.

3. Inflation Scenario for the Month of May, 2026 (based on CPI)

The Consumer Price Index (CPI: Base Year 2024) based inflation rate has increased to 3.93% (provisional) in May, 2026 from 3.48% in April, 2026. Consumer Food Price Index (CFPI) based inflation rate for All-India Combined has increased to 4.78% (provisional) in May, 2026 from 4.20% in April, 2026.

4. A comparative study between the WPI and CPI inflation rates

WPI (Base Year 2022-23) based inflation rate increased by 1.42% (from 8.26% in April, 2026 to 9.68% in May, 2026) and CPI based inflation rate increased by 0.45 (from 3.48% in April, 2026 to 3.93% in May, 2026).

The WPI (Base Year 2022-23) inflation for May, 2026 at 9.68% which is higher by 9.88% from the same period last year (i.e. May, 2025 at -0.20%) and the CPI (Base Year 2024) inflation for May, 2026 is at 3.93% while CPI (Base Year 2012) inflation for the same period last year in May, 2025 was at 2.82%.

On the other hand, WPI (Base Year 2022-23) based Food Index inflation rate for May, 2026 at 4.49% which is higher than the same period last year (i.e. May, 2025 at 0.09%) and the Consumer Food Price Index (Base Year 2024) inflation rate for May, 2026 is at 4.78% while Consumer Food Price Index (Base Year 2012) inflation rate for the same period last year in May, 2025 was at 0.99%.

8. PROCUREMENT

Central Pool Stock (As on 01.06.2026): Actual stock of Rice was 396.32 LMT against Buffer norm of 135.80 LMT. Actual stock of wheat was 534.14 LMT against Buffer Norm of 74.60 LMT. Therefore, Actual stock of Rice & Wheat together was 930.46 LMT against buffer norm of 210.40 LMT.

- Buffer norm changes quarterly, above-mentioned norm is as on 1st April, it changes next on 1st July and so on.
