

CROP WEATHER WATCH GROUP (CWWG) WEEKLY REPORT

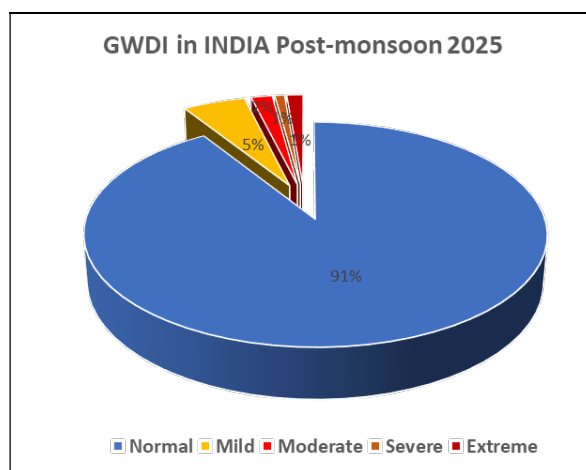

(as on 12.01.2026)

Key Insights

- 1. Rabi Sowing Status:** As on January 09, 2026, the area sown under Rabi crops is 644.29 lakh ha (including 89.36 lakh ha in Rapeseed & Mustard & 95.88 lakh ha in Gram) as compared to 626.64 lakh ha during the corresponding period of last year.
 - As on 09.01.2026, 99% of area has been harvested for Kharif crops all over India.
- 2. Weather Update:**
 - a) **Temperature:** Minimum temperatures are likely to be above normal 2-4°C over Western Himalayan Region and northeast India, these are likely to be near normal over plains of northwest India & adjoining central India. These are likely to be below normal by 2-4°C over East & adjoining Central India during the week.
 - b) **Rainfall Distribution:** From January 01- January 07 2026, the All-India cumulative rainfall is 73% lower than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: (-) 74%; (ii) Northwest India: (-) 79%; (iii) Central India: (-) 98%; and South Peninsula: 24%.
 - A fresh Western disturbance is likely to affect Western Himalayan region from 15th January, 2025.
 - Heavy rainfall very likely at isolated places over Tamil Nadu on 12th January, 2026.
 - Scattered to Fairly widespread activity likely over Western Himalayan Region, Plains of northwest India except Rajasthan and Madhya Pradesh where isolated/scattered rainfall activity is likely.
 - Isolated rainfall activity is likely over Kerala, Lakshadweep and Nicobar Islands.
 - Cold wave to Severe Cold wave conditions very likely to continue over Rajasthan, Punjab, Haryana, Delhi, Himachal Pradesh and Uttarakhand on 12th & 13th with cold wave conditions in isolated pockets on 14th January with reduction thereafter.
 - Dense fog conditions very likely to continue during morning hours over northwest India and Bihar during next 5 day.
 - Cold day conditions likely to prevail in isolated parts of Bihar during 11th -16th January and over North Rajasthan on 11th January.

3. Inputs Situation

- a) **Water Reservoir Status:** As on 08 January 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 138.832 billion cubic meter, which is 75.6% of total live storage capacity (183.565 BCM). The current year's storage is nearly 106.42 percent of last year's storage and 122.60 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** In August 2025, In Post-monsoon 2025, around 90% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.
- The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during Post-monsoon 2025 has been significantly influenced by the over extraction of groundwater compared to the recharge during the monsoon period.
 - Annual water level comparison with the previous year Post-monsoon 2024 to Post-monsoon 2025 has shown that about 63% of total analyzed stations of the country experienced rise in annual water level fluctuation may be attributed to the less groundwater extraction compared to 2024.
 - About 73% of the analyzed stations of the unconfined aquifer experienced a rise of water level in the decadal mean water level fluctuation of 2015-2024 with respect to Post-monsoon 2025.
 - The Groundwater Drought Indices indicate that in **Post-monsoon 2025**, groundwater conditions across India remained largely stable, with **91% of monitoring stations** showing **no deficit**. However, localized deficits were observed in several regions – notably in Meghalaya, Nagaland, and the Dadar Nagar Havili & Daman & Diu.

- c) **Fertilizers:** The fertilizer supply remains stable across all products.

4. Pests & Diseases: There is no major pest incidence that has been reported. The overall intensity of pests and diseases remained below the Economic Threshold Level.

NOTES :

- Rainfall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Overall rainfall activity is likely to near normal to above normal over south Peninsular India and below normal over rest parts of India.

2. TEMPERATURE: MIN & MAX

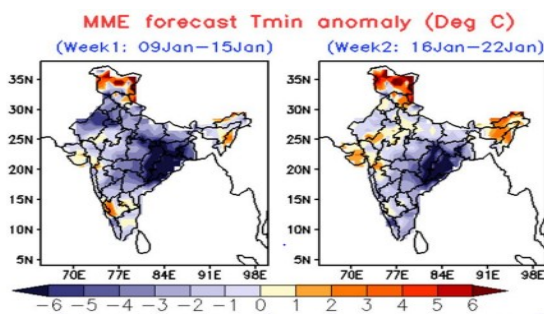

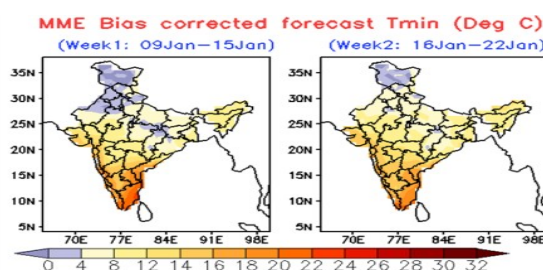

Temperature

Week 1 (09 Jan - 15 Jan 2026):

- Minimum Temperature is likely to be below normal in most of India except J&K, some parts of Himachal Pradesh, Saurashtra-Kutch, some parts of South Karnataka and NE India.

Week 2 (16 Jan - 22 Jan 2026):

- Minimum temperatures are likely to be above normal 2-4°C over Western Himalayan Region and northeast India, these are likely to be near normal over plains of northwest India & adjoining central India. These are likely to be below normal by 2-4°C over East & adjoining Central India during the week.
- Cold wave conditions likely to occur at isolated pockets of Chhattisgarh, Jharkhand and Odisha during some days of the week.
- Dense fog conditions likely to prevail during early morning hours in isolated pockets of Western Himalayan region, Punjab, Haryana & Chandigarh and north Rajasthan, Uttar Pradesh, Bihar and northeastern states during some days of the week.

Crops

Rabi Crops - Area coverage

- **Wheat:** About 334.17 lakh ha (107% of normal) area coverage under Wheat has been reported as compared to 328.04 lakh ha during the corresponding period of last year.
- **Rapeseed & Mustard:** About 89.36 (113% of normal) lakh ha area coverage under Rapeseed & Mustard has been reported as compared to 86.57 lakh ha during the corresponding period of last year.
- **Gram:** About 95.88 (95% of normal) lakh ha area coverage under Gram has been reported as compared to 91.22 lakh ha during the corresponding period of last year.
