

Government of India
Ministry of Agriculture & Farmers Welfare
Department of Agriculture & Farmers Welfare

Weekly report/ Minutes of the Crop Weather Watch Group (CWWG) meeting as on 06.04.2026

Key Insights

1. Rabi Season harvest and Summer Season Sowing Status:

- As on April 10, 2026, the area sown under summer crops is 64.10 lakh ha as compared to 63.33 lakh ha during the corresponding period of last year. Of this, area of 30.59 lakh ha has been sown under Rice this year.
- As on 27.03.2026, 32.26% of area has been harvested for Rabi crops all over India. Approximately 67% area of Pulses mainly in Gram (66%), Urdbean (86%) & Moong (63%); 71.56% area of Oilseeds majorly in Rapeseed & Mustard (75.53%); 38.31% area of Shri Anna cum Coarse Cereals majorly in Jowar (54.47%), 25.57% area of Rice and 6.00% area of Wheat has been harvested for Rabi crops 2025-26.

2. Weather Update:

Temperature: Maximum temperature is likely to be above normal in Tamil Nadu, many parts of Andhra Pradesh, many parts of Odisha, Chhattisgarh and coastal regions of Karnataka.

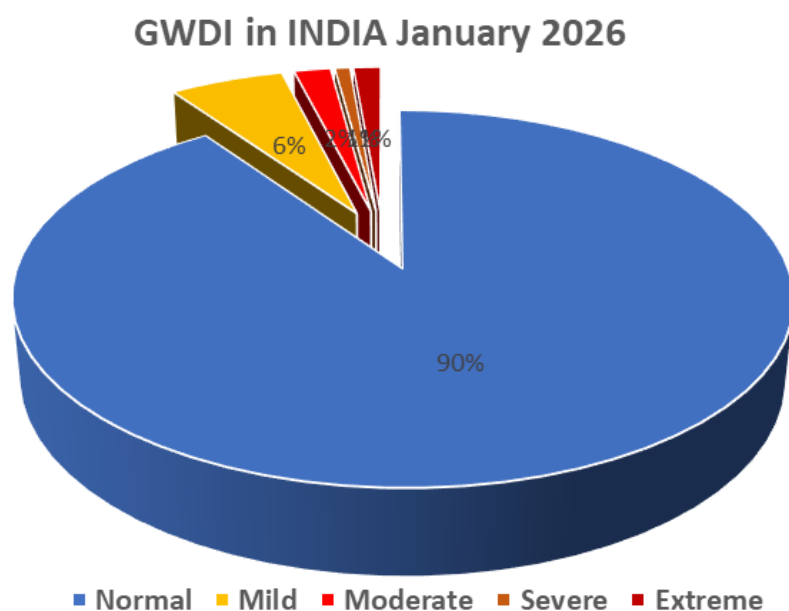

- a) Rainfall Distribution: From March 01– April 12 2026, the All-India cumulative rainfall is 22% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: 40%; (ii) Northwest India: 3%; (iii) Central India: 51%; and South Peninsula: 11%.
- A fresh Western Disturbance is likely to affect Western Himalayan Region from 15th April, 2026.
 - Scattered rainfall with thunderstorms, lightning, and gusty winds is expected across many parts of Northwest, Northeast, East, and South Peninsular India between 9–13 April, with stronger winds reaching 50–60 kmph in some eastern regions.
 - Heavy rainfall is likely at isolated places over Arunachal Pradesh, South Assam, Tripura, and Sikkim, while hailstorm activity may occur over Assam & Meghalaya on 9 April.
 - Light to moderate rain with thunderstorms will also affect parts of Tamil Nadu, Kerala, Rayalaseema, and South Interior Karnataka during this period.
 - Gradual rise in maximum temperatures likely over Northwest, Central & East India by 3-6°C during next 4-5 days. As a result, maximum temperatures are likely to be above normal over these region after 2 days.
 - Heat wave conditions very likely in isolated pockets of Saurashtra & Kutch on 13th; Odisha during 14th -16th; Madhya Pradesh, Vidarbha, Chhattisgarh during 16th -18th; Marathwada on 16th April.

3. Inputs Situation

- a) Water Reservoir Status: As on 10 April 2026, the total live water storage in 166 important reservoirs across the country (monitored by CWC) is 82.070 billion cubic meter, which is 44.71% of total live storage capacity (183.565 BCM). The current year's storage is nearly 117.66 percent of last year's storage and 127.01 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last

year in the country as a whole and is also better than the Normal storage during the corresponding period.

- **Groundwater Levels:** In Post-monsoon 2025, In January, 2026, around 75.8% of the country's monitoring stations exhibited a depth to water level within 10 meters below ground level. Deeper water levels of more than 20 m are observed in around 13.5% of stations of the country covering mainly the western states, especially Western Rajasthan, Punjab, Haryana and Chandigarh.
- The deeper groundwater level in the states like Western Rajasthan, Punjab, Haryana and Chandigarh during January, 2026 has been significantly influenced by the over extraction of groundwater compared to the recharge in the area, indicating negative water balance.
- About 70% of the analyzed stations of the unconfined aquifer experienced a rise of water level in January, 2026 when compared to the decadal mean water level of 2016-2025.
- The Groundwater Drought Indices indicate that in January, 2026, groundwater conditions across India remained largely stable, with 90.30% of monitoring stations falling under normal condition in respect of Ground Water Drought. However, localized deficits were observed in several regions — notably in Arunachal Pradesh, Himachal Pradesh, Meghalaya, Nagaland.

b) Fertilizers: The fertilizer supply remains stable across all products.

4. **Pests & Diseases:** The overall intensity of pests and diseases remained below the Economic Threshold Level.

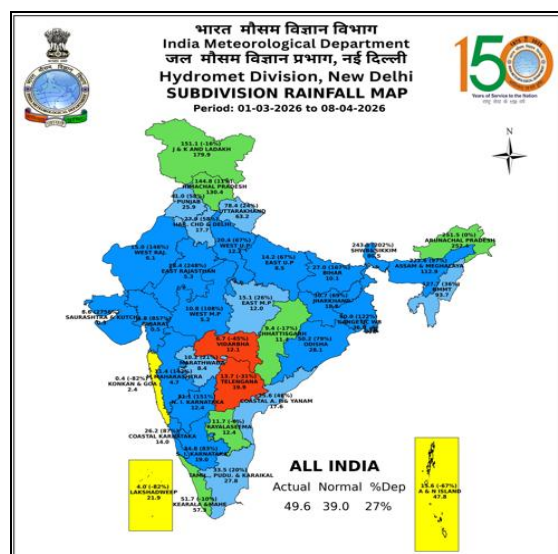

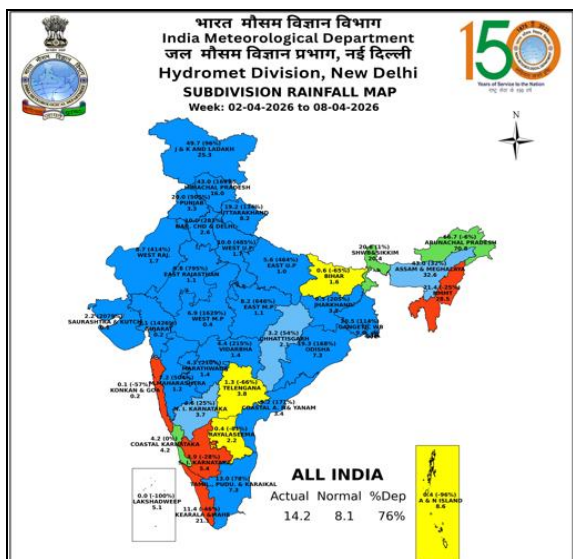

5. **Crops whose Mandi Wholesale prices are below MSP:**

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 10-04-2026	% Variation over MSP
Paddy (Rice unmilled)	2369	2332	-1.56
Wheat	2585	2460	-4.84
Maize	2400	1709	-28.79
Arhar	8000	7377	-7.79
Gram whole	5875	5281	-10.11
Masur	7000	6733	-3.81
Moong	8768	7035	-19.77
Urad	7800	7668	-1.69
Jowar	3699	3273	-11.52
Bajra	2775	2009	-27.60
Ragi	4886	3141	-35.71
Groundnut	7263	6568	-9.57
Sunflower	7721	6430	-16.72

Details of each Segment

1. RAINFALL

- During the week (02 April – 08 April 2026), higher rainfall was observed, as compared to Long Period Average (LPA) by 76%. Cumulative seasonal rainfall (01st March to 08 April 2026) is higher than LPA by 27%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- RainFall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

- Overall, thunderstorm activity is likely to continue over the northeast & adjoining east India during the week.
- Overall, rainfall is likely to be below normal over most parts of the country.

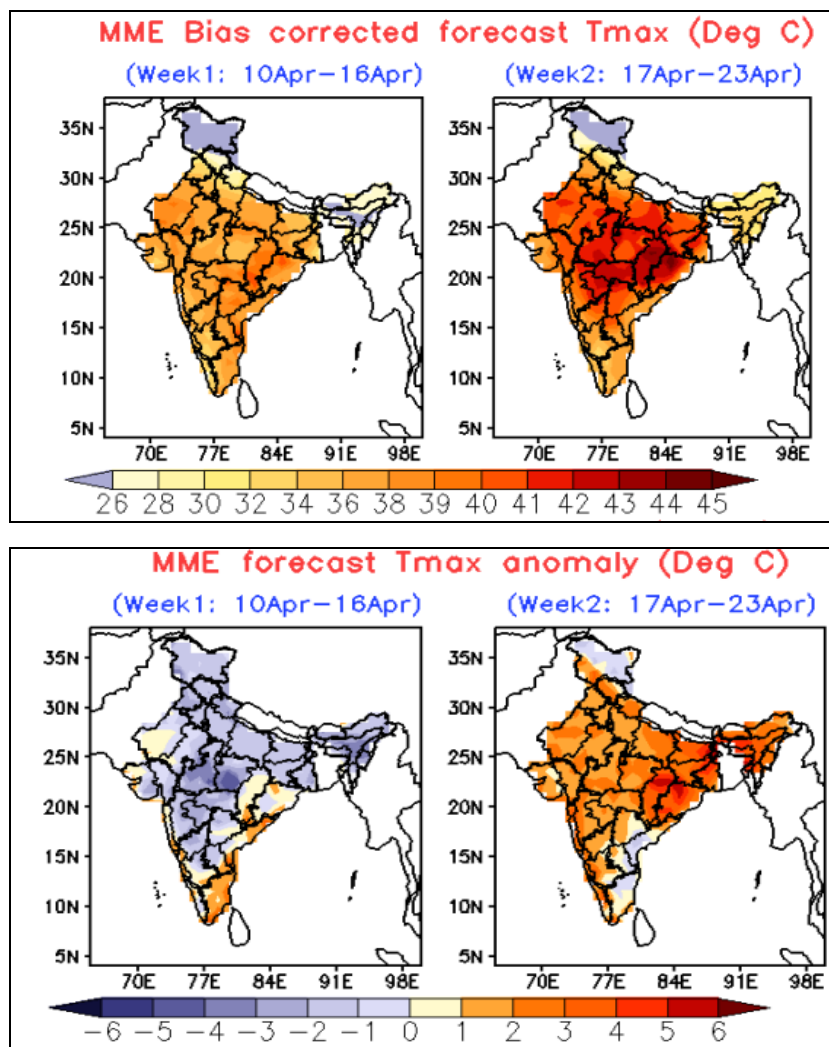

2. TEMPERATURE: MIN & MAX

Week 1 (10 April – 16 April 2026):

- Overall, Day temperatures are likely to remain below normal to near normal over most part of northwest, central & east India during next 2-3 days and gradually become above normal thereafter.

Week 2 (10 April – 16 April 2026):

- Low to moderate Probability of Heat Wave conditions likely during the week 2 over some parts of Odisha, Jharkhand, Bihar, Chhattisgarh, & north Coastal Andhra Pradesh. Appreciably above normal (+3.1 to +5.0°C) maximum temperatures are likely over some parts of Odisha, north Coastal Andhra Pradesh, Jharkhand, Bihar, Chhattisgarh, Gangetic West Bengal and East Uttar Pradesh; normal to above-normal maximum temperatures ((+1.6 to +3.0°C) are likely over most parts of Northwest India, and many parts of the East & Northeast, South and Western parts of India. Below-normal weekly maximum temperatures are likely in isolated places over the rest of the country.
- No warm night conditions are likely during the week.

3. CROPS

Rabi Crops - Area coverage

- **Rice:** About 30.59 lakh ha area coverage under Summer Rice has been reported as compared to 32.30 lakh ha during the corresponding period of last year.
- **Pulses:** About 11.54 lakh ha area coverage has been reported compared to 10.71 lakh ha during the corresponding period of last year.
- **Oilseeds:** About 8.31 lakh ha area coverage has been reported compared to 7.62 lakh ha during the corresponding period of last year.

Progress of Area coverage under Summer crops as on 10.04.2026						
(In lakh hectare)						
Sl. No.	Crops	Normal Summer Area (DES)*	Final Summer Area 2025	Area Sown		Increase/ Decrease over corresponding period of Last year
				Current Year (2026)	Corresponding period of Last Year (2025)	
1	Rice	31.49	33.28	30.59	32.30	-1.72

4. RESERVOIR STORAGE

As on 10 April, 2026, the current live storage in 166 reservoirs was 82.070 BCM (44.71%) of total live capacity of 183.565 BCM.

- 147 reservoirs having storage more than 80% of normal storage.
- 11 reservoirs having storage 51% to 80%.
- 08 reservoirs having storage upto 50%.

The status for 166 major reservoirs of the country			
Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	45	117	127
Last Week	47	116	127

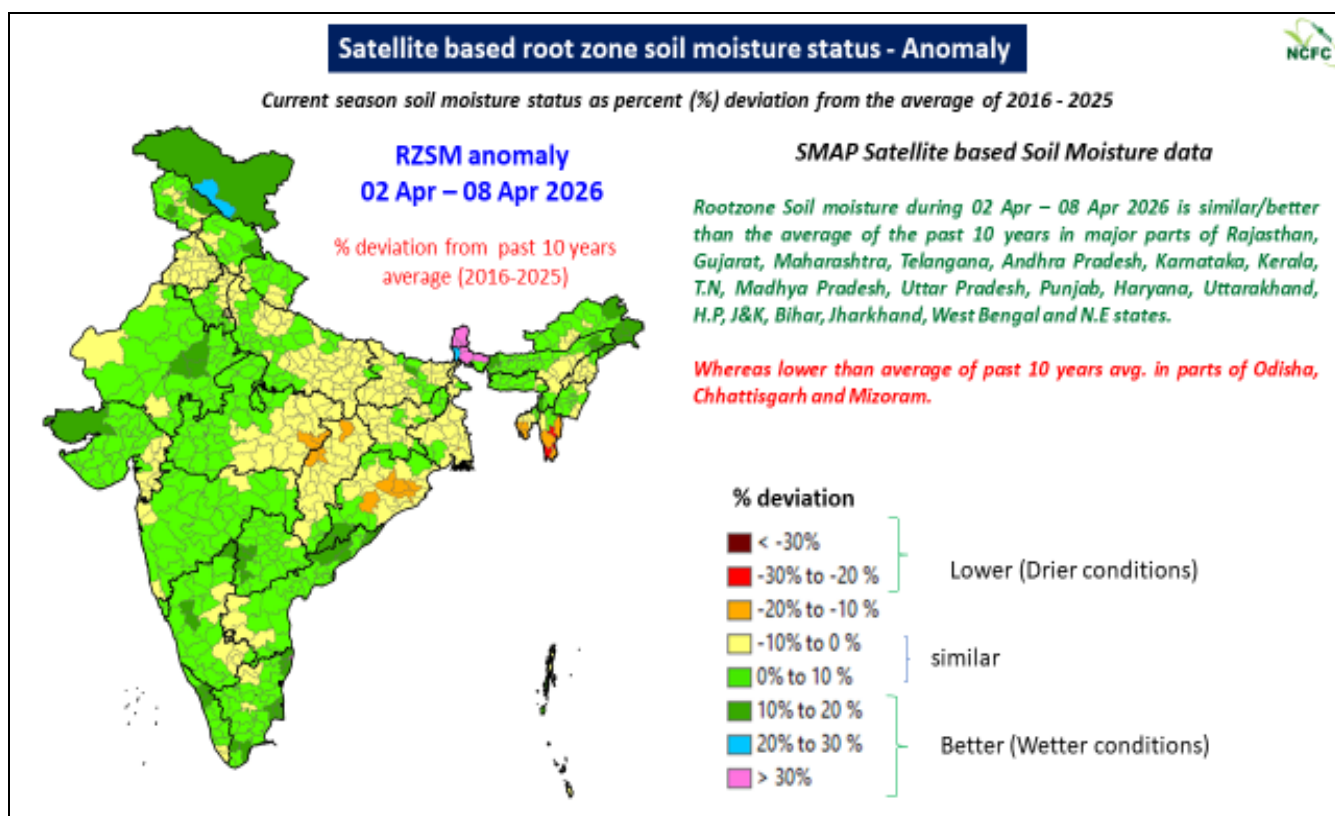

Source: CWC

5. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

Soil Moisture Observation

- Soil moisture during 02 April – 08 April 2026 is similar/better than the average of the past 10 years in major parts of Rajasthan, Gujarat, Maharashtra, Telangana, A.P., Karnataka, Kerala, Madhya Pradesh, Uttar Pradesh, Punjab, Haryana, Uttarakhand, H.P., J & K, Bihar, Jharkhand, West Bengal and N.E. States.
- It was lower than average of past 10 years in parts of Odisha, Chhattisgarh and Mizoram.

6. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Kharif 2026 as on 10.04.2026 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2026	Total sale during Kharif 2026	(as on 10/04/26)		
			Availability	Sales	Closing stock
UREA	194.02	5.37	59.59	5.37	54.23
DAP	59.17	1.36	21.33	1.36	19.97
MOP	17.57	0.42	8.11	0.42	7.69
NPK	84.99	1.81	50.03	1.81	48.22
SSP	34.81	0.71	24.15	0.71	23.44
TOTAL	390.56	9.67	163.21	9.67	153.55

- In case of DAP, The opening stock of Kharif 2026 as compared to the opening stock of Kharif 2025 is more by 11.78 LMT
- As on 10th April, 2026 the availability of DAP is 21.33 LMT against the requirement of 7.69 LMT during the ongoing Kharif 2026 season.
- As on 10th April 2026, adequate stock of Urea (59.59 LMT), DAP (21.33 LMT), MOP (8.11 LMT), NPK (50.03 LMT) and SSP (24.15 LMT) is available.

7. **PEST & DISEASE**

- The overall intensity of pests and diseases remained below the Economic Threshold Level.
